Conservation Science Conservation Science:

Conservation Science: Balancing the Needs of People and Nature Peter Kareiva, Michelle Marvier, 2024-07-25 Focused on protecting nature and the planet Conservation Science Balancing the Needs of People and Nature contains a heavy emphasis on highlighting strategies to better connect the practice of conservation with the needs and priorities of a growing human population to give you an overview of this important area of science **What is Conservation Science?** Peter

Kareiva, 2012 In 1985 Michael Soule asked What is conservation biology We revisit this question more than 25 years later and offer a revised set of core principles in light of the changed global context for conservation Most notably scientists now widely acknowledge that we live in a world dominated by humans and therefore the scientific underpinnings of conservation must include a consideration of the role of humans Today's conservation science incorporates conservation biology into a broader interdisciplinary field that explicitly recognizes the tight coupling of social and natural systems Emerging priorities include pursuing conservation within working landscapes rebuilding public support working with the corporate sector and paying better attention to human rights and equity We argue that in conservation strategies must be promoted that simultaneously maximize the preservation of biodiversity and the improvement of human well being **Conservation**

Science and Action William J. Sutherland, 2009-07-01 Conservation Science and Action is intended for upper level undergraduate and graduate courses in conservation biology This book reviews the latest thinking and approaches and in doing so provides a readily accessible reference work for conservation professionals and managers Because conservation biology is now one of the most dynamic disciplines in the life sciences William Sutherland and his international team of authors have selected many of the liveliest topics where key advances are currently being made They stress ideas point to unresolved issues and suggest possible future developments Finally since conservation is an applied subject the book's emphasis throughout is on action Essential reading for senior undergraduate and postgraduate students taking courses in conservation biology one of the most dynamic disciplines in the life sciences Contributions from leading figures in the field who have selected the liveliest topics where key advances are being made Reviews the latest thinking and approaches Contributors cover a range of taxonomic groups include aquatic and terrestrial plants and animals and give examples from around the world Emphasis given to action and all chapters have an applied component **Effective Conservation Science**

Peter Kareiva, Michelle Marvier, Brian Silliman, 2017-10-06 This novel text assembles some of the most intriguing voices in modern conservation biology Collectively they highlight many of the most challenging questions being asked in conservation science today each of which will benefit from new experiments new data and new analyses The book's principal aim is to inspire readers to tackle these uncomfortable issues head on A second goal is to be reflective and consider how the field has reacted to challenges to orthodoxy and to what extent have or can these challenges advance conservation science Furthermore several chapters discuss how to guard against confirmation bias The overall goal is that this book will lead to

greater conservation of ecosystems and biodiversity by harnessing the engine of constructive scientific scepticism in service of better results **Conservation Science and Advocacy for a Planet in Peril** Dominick A. DellaSala, 2021-08-18 Conservation Science and Advocacy for a Planet in Peril Speaking Truth to Power helps equip scientists working on environmental and sustainability challenges with new tactics for success Global efforts and cooperation by member states of environmental conventions have steadily increased but lack efficient and scalable mechanisms of translating conservation science to policy The gap between science and policy is growing and very little time remains before the climate change and biodiversity losses trigger widespread disruptions of the planet's life support systems This book covers these important topics providing a must read for environmental and conservation scientists climate change activists students social scientists economic professionals sustainable businesses and policymakers Provides an unprecedented collection of local regional and national case studies from scientists and practitioners engaged in outreach to decision makers and the public Covers personal accounts that bring science into policymaking providing usable guidelines for those working to bridge this gap Includes the requisite information needed for effective communications and campaign strategies by sharing lessons learned

Conservation Biology Andrew S. Pullin, 2002-06-27 This colourful textbook introduces students to conservation biology the science of preserving biodiversity ***Marine Conservation*** G. Carleton Ray, Jerry McCormick-Ray, 2013-12-31 Providing a guide for marine conservation practice Marine Conservation takes a whole systems approach covering major advances in marine ecosystem understanding Its premise is that conservation must be informed by the natural histories of organisms together with the hierarchy of scale related linkages and ecosystem processes The authors introduce a broad range of overlapping issues and the conservation mechanisms that have been devised to achieve marine conservation goals The book provides students and conservation practitioners with a framework for thoughtful critical thinking in order to incite innovation in the 21st century Marine Conservation presents a scholarly but eminently readable case for the necessity of a systems approach to conserving the oceans combining superb introductions to the science law and policy frameworks with carefully chosen case studies This superb volume is a must for anyone interested in marine conservation from students and practitioners to lay readers and policy makers Simon Levin George M Moffett Professor of Biology Department of Ecology Evolutionary Biology Princeton University ***Protecting Life on Earth*** Michael Paul Marchetti, Peter B. Moyle, 2010-09-01 Written to be accessible to any college level reader Protecting Life on Earth offers a non technical yet comprehensive introduction to the growing field of conservation science This multifaceted exploration of our current biodiversity crisis delivers vivid examples throughout including features on some of nature's most compelling wildlife Beginning with a brief introduction to environmental history the text introduces the central concepts of evolution and ecology and covers several major issues related to the conservation of biodiversity including extinction climate change sustainability conservation law and invasive species It also touches on adjacent disciplines such as economics and sociology as they relate to conservation The

text even includes practical advice on the decisions we make every day how we spend our money where we live and work what we eat and buy Throughout Protecting Life on Earth underscores the ways in which our future is tied to that of Earth's threatened species and demonstrates exactly why conservation is so vitally important for us all [Science for Conservators](#)

The Conversation Unit of the Museums & Galleries Commission, 1984 **Conservation Research, Policy and Practice**

William J. Sutherland, Peter N. M. Brotherton, Zoe G. Davies, Nancy Ockendon, Nathalie Pettorelli, Juliet A. Vickery, 2020-04-16

Conservation research is essential for advancing knowledge but to make an impact scientific evidence must influence conservation policies decision making and practice This raises a multitude of challenges How should evidence be collated and presented to policymakers to maximise its impact How can effective collaboration between conservation scientists and decision makers be established How can the resulting messages be communicated to bring about change Emerging from a successful international symposium organised by the British Ecological Society and the Cambridge Conservation Initiative this is the first book to practically address these questions across a wide range of conservation topics Well renowned experts guide readers through global case studies and their own experiences A must read for practitioners researchers graduate students and policymakers wishing to enhance the prospect of their work making a difference This title is also available as Open Access on Cambridge Core
