Console and Classify Jan Ellen Goldstein, 1990 Work and Occupation in French and English Mental Hospitals, c.1918-1939 Jane

Freebody,2023-01-01 This open access book demonstrates that while occupation has been used to treat the mentally disordered since the early nineteenth century approaches to its use have varied across different countries and in different time periods Comparing how occupation was used in French and English mental institutions between 1918 and 1939 one hundred years after the heyday of moral therapy the book is an essential read for those researching the history of mental health and medicine more generally It provides an overview of the legislation management structures and financial conditions that affected mental institutions in France and England and contributed to their differing responses to the new theories of occupational therapy emerging from the USA and Germany during the interwar period *“Misfits” in Fin-de-Siècle France and Italy* Susan A. Ashley,2017-05-04 As the 19th century drew to a close France and Italy experienced an explosion of crime vagrancy insanity neurosis and sexual deviance Misfits in Fin de Si cle France and Italy examines how the raft of self appointed experts that subsequently emerged tried to explain this aberrant behavior and the many consequences this had Susan A Ashley considers why these different phenomena were understood to be interchangeable versions of the same inborn defects The book looks at why specialists in newly minted disciplines in medicine and the social sciences such as criminology neurology and sexology all claimed that biological flaws some inherited and some arising from illness or trauma made it impossible for these misfits to adapt to modern life Ashley then goes on to analyse the solutions these specialists proposed often distinguishing between born deviants who belonged in asylums or prisons and accidental misfits who deserved solidarity and social support through changes to laws relating to issues like poverty and unemployment The study draws on a comprehensive examination of contemporary texts and features the work of leading authorities like Cesare Lombroso Jean Martin Charcot and Th odule Ribot as well as investigators less known now but influential at the time The comparative aspect also interestingly shows that experts collaborated closely across national and disciplinary borders employed similar methods and arrived at common conclusions This is a valuable study for all social and cultural historians of France and Italy and anyone interested in knowing more about the history of medicine in modern Europe **Routledge**

Library Editions: Psychiatry Various,2021-07-28 Psychiatry is a medical field concerned with the diagnosis treatment and prevention of mental health conditions Routledge Library Editions Psychiatry 24 Volume set brings together titles originally published between 1958 and 1997 The set demonstrates the varied nature of mental health and how we as a society deal with it Covering a number of areas including child and adolescent psychiatry alternatives to psychiatry the history of mental health and psychiatric epidemiology Wrong-Doing, Truth-Telling Michel Foucault,2014-06-04 Three years before his death Michel Foucault gave a series of lectures at the Catholic University of Louvain that have remained relatively unknown until only recently Entitled Wrong Doing Truth Telling these lectures provides the missing link between Foucault s early work on sexuality and punishment and his later work on Greek and Roman antiquity Ranging broadly from Homer to the 20th century Foucault traces how the early ethical acts of truth telling in ancient Greece gradually metamorphosed into acts of

self incrimination in monastic times and ultimately into the birth and rise of psychiatry as the foundation of modern penology criminology and criminal justice For Foucault self incrimination no longer did the work necessary to quell justice because by the 19th century we wanted to know more than just the fact of wrongdoing we wanted to know who the criminal was not just whether the accused committed the crime but what it was about him that made him commit the crime An avowal of wrong doing was no longer sufficient psychiatric expertise was now necessary and that development marks the birth of discipline and modern criminal justice made so famous by Foucault

Thomas Huxley Paul White, 2003 Dubbed Darwin's Bulldog for his combative role in the Victorian controversies over evolutionary theory Thomas Huxley has been widely regarded as the epitome of the professional scientist who emerged in the nineteenth century from the restrictions of ecclesiastical authority and aristocratic patronage Yet from the 1850s until his death in 1895 Huxley always defined himself as a man of science a moral and religious figure not a scientist Exploring his relationships with his wife fellow naturalists clergymen and men of letters White presents a new analysis of the authority of science literature and religion during the Victorian period showing how these different practices were woven into a fabric of high culture and integrated into institutions of print education and research He provides a substantially different view of Huxley's role in the evolution debates and of his relations with his scientific contemporaries especially Richard Owen and Charles Darwin
