Douglas, David Carless, 2014-12-17 What is life really like for the elite athlete How does the experience of being a professional sports person differ from the popular perceptions of fans journalists or academics Why might elite sports people experience mental health difficulties away from the public gaze In the first book length study of its kind Kitrina Douglas and David Carless present the life stories of real elite athletes alongside careful analysis and interpretation of those stories in order to better understand the experience of living in sport Drawing on psychology sociology counselling psychotherapy and narrative theory and on narrative research in sports as diverse as golf track and field athletics judo and hockey they explore the ways in which the culture of sport interacts with the mental health development identity and life trajectories of elite and professional sports people in highly pressurised and sometimes unhealthy environments By casting light on a previously under researched aspect of sport the book makes a call for strategies to be put in place to minimise difficulties or distress for athletes for support to be tailored across the different life phases and highlights the potential benefits in terms of athlete well being and improved performance The book also considers how these important issues relate to broader cultural and social factors and therefore represents important reading for any student or professional with an interest in sport psychology coaching sport sociology youth sport counselling or exercise and mental health **The Psychology of Doping in Sport**

Vassilis Barkoukis, Lambros Lazuras, Haralambos Tsorbatzoudis, 2015-07-16 This is the first book to draw together cutting

edge research on the psychological processes underlying doping use in sport and exercise thereby filling an important gap in our understanding of this centrally important issue in contemporary sport. Covering diverse areas of psychology such as social cognition, automatic and controlled processes, moral decision making, and societal and contextual influence on behaviour, the book also explores methodological considerations surrounding doping assessment in psychological research as well as future directions for evidence-based preventive interventions and anti-doping education. Written by a team of leading international researchers from countries including the US, Canada, Australia, the UK, Greece, Germany, Italy, Denmark, and Ireland, the book integrates empirical findings with theoretical guidance for future psychological research on doping and illuminates the challenges, needs, and priorities in contemporary doping prevention. It is important reading for advanced students and researchers in sport and exercise science, sport management, and sport policy, and will open up new perspectives for professional coaches, sports administrators, policy makers, and sport medicine specialists looking to better understand the doping behaviours of athletes in sport.

The Self and its Disorders Shaun Gallagher, 2023-12-03

Shaun Gallagher offers an account of psychopathologies as disorders of the self. *The Self and its Disorders* develops an interdisciplinary approach to an integrative perspective in psychiatry. In contrast to some integrative approaches that focus on narrow brain-based conceptions or on symptomology, this book takes its bearings from embodied and enactive conceptions of human experience. Gallagher offers an understanding of the self as a pattern of processes that include bodily, experiential, affective, cognitive, intersubjective, narrative, ecological, and normative factors. He provides a philosophical analysis of the notion of self-pattern, then drawing on phenomenological, developmental, clinical, and experimental evidence, he proposes a method to study the effects of psychopathologies on the self-pattern. The book includes specific discussions of schizophrenia, anxiety disorders, depression, borderline personality disorder, and autism among other disorders, as well as the effects of torture and solitary confinement. It also explores a variety of issues that relate to therapeutic approaches, including deep brain stimulation, meditation-based interventions, and the use of artificial intelligence and virtual reality.
