Advances in Manufacturing Technology XVII 2003 Y. Qin, N. P. Juster, 2003-10-24 *Advances in Manufacturing Technology XVII* continues a well respected series with the papers presented at the 1st International Conference on Manufacturing Research ICMR 2003 incorporating the 19th National Conference on Manufacturing Research NCMR. This essential text provides a thorough review of all aspects of manufacturing engineering and management and will be of interest to all those involved in this rapidly advancing sphere of mechanical and manufacturing engineering. Topics covered include Machining Processes and Tooling, Forming Processes and Tools, Advanced Manufacturing Techniques, Advanced Manufacturing Systems, Design Methods, Processes and Systems, CAD/CAM, Testing, Experimentation, Metrology, Internet and E design, Manufacture, Virtual Enterprise and Enterprise Integration. *Fifth National Conference on Rapid Design, Prototyping and Manufacture* David M. Jacobson, Allan Rennie, Chris Bocking, 2004-09-24. Rapid Prototyping and allied fields are still relatively young technologies and as such their scope and range are expanding at a dramatic rate. New and improved techniques and applications are developing and this is reflected in the varied topics covered in *Rapid Design, Prototyping and Manufacture*. Efforts to extend the scope of application of three dimensional printing processes is an important milestone in rapid manufacture. This is being vigorously addressed and is well represented in this volume. It now seems to be only a matter of time before three dimensional printing units will join other peripherals in office and domestic computer systems to produce toys, small domestic and office items on demand. **CONTENTS INCLUDE:** Analysis of the application of the Z Corp's three dimensional printing system for rapid tooling for plastic injection moulded components; A novel method for rapid prototyping tooling manufacture; Shell Assisted Layer Manufacture (SALM); Accuracy of a novel fused deposition modelling technology; New software tools for reverse engineering parts based on three dimensional volumetric scans; A structured approach to the simplification of optimization problems in the virtual prototyping environment; The appropriate application of computer aided design and manufacture techniques in silicone facial prosthetics; Application of the Z Corp's three dimensional printing processes using novel material to manufacture bio scaffold for bone replacement; Rapid prototyping manufacture of complex three dimensional microscaffolds used in regenerative medicine. **Climbing and Walking Robots and the Supporting Technologies for Mobile Machines** G. Muscato, D. Longo, 2003-11-07. Bringing together academics, researchers and industrialists, *Climbing and Walking Robots 2003* CLAWAR 2003 provides a forum for cross fertilization in the different specialities so that both state of the art and industrial applications can be reported on. Original contributions both industrial and those in new emerging fields provide a full picture of climbing and walking robots. The interest in climbing and walking robots, CLAWAR has increased considerably over recent years, addressing many application fields such as exploration, intervention in extreme environments, personal services, emergency rescue operations, transportation, entertainment etc and envisage humanoid robots evolving into mechatronic replicas of ourselves. Topics covered include Biological Inspired Systems
