Decision Making and Operations Research Techniques for Construction Management C. M. TAM, Thomas K. L. TONG, H. ZHANG, 2007-06-01 This book provides scientific tools for practitioners to resolve some practical problems which are administered empirically at present and may lead to inconsistent results and human errors. The modern decision making tools introduced in this book include Multi criteria Decision making Models, Artificial Neural Network, Genetic Algorithms, Construction Simulation, Rough Set Theory and Advanced Statistical Techniques for construction. Published by City University of Hong Kong Press.

Construction Program Management - Decision Making and Optimization Techniques Ali D. Haidar, 2015-09-12 Exploring complex and intelligent analytical and mathematical methods, this book examines how different approaches can be used to optimize program management in the construction industry. It presents an in-depth study of the different program management methods ranging from simple decision making techniques and statistics analysis to the more complex linear programming and demonstrates how knowledge base systems and genetic algorithms can be used to optimize resources and meet time budget and quality criteria. It addresses topics including decision making principles, planning and scheduling, mathematical forecasting models, optimization techniques, programming and artificial intelligence techniques. Providing a valuable resource for anyone managing multiple projects in the construction industry, this book is intended for civil and construction engineering students, project managers, construction managers and senior engineers.
