

To recall e-DATA MEMORY records
In the e-DATA MEMORY Mode, use $\leftarrow$ and $\rightarrow$ to cycle through e-DATA MEMORY records as shown below.

Remaining Memory Screen

- The value on the remaining memory screen is the percentage of memory that is still available. It does not indicate the number of records that can be stored.
- The Password Setting screen shows $\rightarrow$ $\rightarrow$ $\rightarrow$ when a password is already registered.
- You can use the Password Setting screen to register, edit, or delete your password. See "Using a Password to Protect e-DATA MEMORY Data" for more information.

To edit an e-DATA MEMORY record

- In the e-DATA MEMORY Mode, use $\leftarrow$ and $\rightarrow$ to display the record you want to edit.
- Hold down $\downarrow$ until the flashing cursor appears on the display.
- Use $\leftarrow$ and $\rightarrow$ to change the character you want to change.
- Use $\leftarrow$ and $\rightarrow$ to change the character.
- After making the changes you want, press $\downarrow$ to store them and return to the e-DATA MEMORY record screen.

To delete an e-DATA MEMORY record

- In the e-DATA MEMORY Mode, use $\leftarrow$ and $\rightarrow$ to display the record you want to delete.
- Hold down $\downarrow$ until the flashing cursor appears on the display.
- Press $\leftarrow$ and $\rightarrow$ at the same time to delete the record.
 - The message CLR appears to indicate that the record is being deleted. After the record is deleted, the cursor appears on the display, ready for input.
- Input data or press $\downarrow$ to return to the remaining memory screen.

Using a Password to Protect e-DATA MEMORY Data

You can register a 4-digit password to keep e-DATA MEMORY data secure.

Important!

Use a 4-digit password that is easy for you to remember, but difficult for others to decipher. If you forget the password, you will have to have your watch initialized (which deletes all data in memory) in order to access the e-DATA MEMORY again. To have the watch initialized, contact the store or dealer where you purchased it, and ask to have the AC operation performed.

To register a new password

- In the e-DATA MEMORY Mode, use $\leftarrow$ and $\rightarrow$ to display the Password Setting screen.
 - This displays a screen that shows SET P=55.
- Hold down $\downarrow$ for about one second until NEDU appears, with the first 0 flashing.
 - This is the New Password Setting screen.
- Use $\leftarrow$ and $\rightarrow$ to scroll through numbers as the first digit.
- When the first digit is the number you want, press $\downarrow$ to advance to the next digit.
- Repeat steps 3 and 4 to input all four digits of the password you want.
 - Pressing $\downarrow$ while inputting a new password clears your input and returns to the Password Setting screen.
- After all four of the password digits are the way you want, press $\downarrow$ to register them.
- Pressing $\downarrow$ causes the message SET to appear for about one second as the password is stored. After that, the Password Setting screen appears.
- After registering a password, you can input, recall, edit and delete data. If you want, after you exit the e-DATA MEMORY Mode, you will have to input the password every time you want to enter it again.

To input the password

- Enter the e-DATA MEMORY Mode.
- On the Password Input screen ($\rightarrow$ $\rightarrow$ $\rightarrow$ P=55), press $\downarrow$ or $\rightarrow$. This causes the first digit of the password to flash.
- Input the password.
 - Use $\leftarrow$ and $\rightarrow$ to scroll through numbers at each digit.
 - Press $\downarrow$ to advance to the next digit.
 - Pressing $\downarrow$ while inputting the password clears your input and returns to the Password Input screen.
- After the password is the way you want, press $\downarrow$.
 - If the input matches the one registered, the message OK appears, followed by an e-DATA MEMORY screen.
 - If the password does not match, the message ERROR appears, followed by the Password Input screen.

To change the password

- Enter the e-DATA MEMORY Mode by inputting the current password.
- Use $\leftarrow$ and $\rightarrow$ to display the Password Setting screen.
- Perform the procedure starting from step 2 under "To register a new password" to specify the new password.

To delete the password

- Enter the e-DATA MEMORY Mode by inputting the current password.
- Use $\leftarrow$ and $\rightarrow$ to display the Password Setting screen.
- Hold down $\downarrow$ for about one second until NEDU appears, with the first 0 flashing.
- Press $\leftarrow$ and $\rightarrow$ at the same time to delete the password.
 - The message CLR appears to indicate that the password is being deleted. After the password is deleted, the Password Setting screen appears.

World Time

World Time shows the current time in 217 cities (29 time zones) around the world.

- All of the operations in this section are performed in the World Time Mode, which you enter by pressing $\downarrow$.

To view the time in another city code

- In the World Time Mode, press $\downarrow$ to scroll through city codes (time zones) to the east or $\rightarrow$ to scroll to the west.
- For full information about city codes, see the "City Code Table".
- If the current time shown for a city is wrong, check your Timekeeping Mode time and Home City code settings and make the necessary changes.
- When the currently selected time zone is one that includes monthly changes, a value indicating the zone's Greenwich Mean Time differential appears in place of a city code.

To toggle a city code time between Standard Time and Daylight Saving Time

- In the World Time Mode, use $\leftarrow$ and $\rightarrow$ to display the city code (time zone) whose Standard Time/Daylight Saving Time setting you want to change.
- Press $\downarrow$ to scroll through one second to toggle Daylight Saving Time (DST) displayed and Standard Time (ST) not displayed.
- The DST indicator is on the display whenever your display is city code for which Daylight Saving Time is turned on.

- Note that the DST/Standard Time setting affects only the currently displayed city code. Other city codes are not affected.
- Note that you cannot switch between Standard Time and Daylight Saving Time while DST is selected as the city code.

Alarms

You can set up to five independent multi-function alarms with hour, minutes, month, and day. When an alarm is turned on, the alarm tone sounds when the alarm time is reached. One of the alarms is a snooze alarm, while the other four are one-time alarms. You can also input reminder time that appears when the alarm time is reached.

- You can also turn on an Hourly Time Signal that causes the watch to beep twice every hour on the hour.
- There are five alarm screens, numbered RL-1 through RL-5, for the one-time alarm, a snooze alarm screen indicated by SNZC. The Hourly Time Signal screen is indicated by SIG.
- In the case of the snooze alarm screen, the snooze alarm indicator (SNOO) appears in the lower right corner of the display.

- Alarm settings (and Hourly Time Signal settings) are available in the Alarm Mode, which you enter by pressing $\downarrow$.

Alarm Types

The alarm type is determined by the settings you make, as described below.

Daily alarm

Set the hour and minutes for the alarm time. This type of setting causes the alarm to sound everyday at the time you set.

Date alarm

Set the month, day, hour and minutes for the alarm time. This type of setting causes the alarm to sound at the specific time, on the specific date you set.

1-Month alarm

Set the month, hour and minutes for the alarm time. This type of setting causes the alarm to sound everyday at the time you set, only during the month you set.

Monthly alarm

Set the day, hour and minutes for the alarm time. This type of setting causes the alarm to sound every month at the time you set, on the day you set.

To set an alarm time

- In the Alarm Mode, use $\leftarrow$ and $\rightarrow$ to scroll through the alarm screens until the one whose time you want to set is displayed.

- To set a one-time alarm, display one of the screens indicated by an alarm number from RL-1 through RL-4. To set the snooze alarm, display the screen indicated by SNZ.
- The snooze alarm repeats every five minutes. After you select an alarm, hold down $\downarrow$ until the hour setting of the alarm time starts to flash, which indicates the setting screen. This operation automatically turns on the alarm.
- Press $\leftarrow$ to move the flashing in the sequence shown below to select other settings.

- Selecting the text causes the text input cursor (BL) to appear. There are eight spaces in the text, so you have to press $\leftarrow$ eight times to move to the hour setting.
