Manportable Air Defense (MANPAD) Technical And Doctrinal History From 1980 To 2018 U.S. Army, Over 2 800
total pages INTRODUCTION Today s operational environment presents threats the Army has not faced in nearly 20 years
Against peer competitors the joint force may face air parity or even localized enemy air overmatch challenging the
assumption of air superiority the joint force has held since the Korean War This will make maneuver forces vulnerable to air
attack by fixed and rotary wing aircraft unmanned aircraft systems and cruise missiles Maneuver forces lack capacity and
capability to address these threats and the Army requires a speedy response Stinger missiles provide a key capability for
maneuver forces to defend themselves from aerial observation and attack However without direct involvement from senior
brigade combat team leaders and effective leader training these missiles will become dead weight at best or a fratricide in
waiting at worst Units must plan effectively to utilize this capability and ensure it ties directly to their scheme of maneuver as
opposed to simply task organizing one Stinger team per company Just a SAMPLE of the CONTENTS CALL HANDBOOK NO
