The end of the experiment? Mick Moran, Andrew Bowman, Julie Froud, Sukhdev Johal, John Law, Adam Leaver, Karel Williams, 2014-05-31 For thirty years the British economy has repeated the same old experiment of subjecting everything to competition and market because that is what works in the imagination of central government This book demonstrates the repeated failure of that experiment by detailed examination of three sectors broadband food supply and retail banking The book argues for a new experiment in social licensing whereby the right to trade in foundational activities would be dependent on the discharge of social obligations in the form of sourcing training and living wages Written by a team of researchers and policy advocates based at the Centre for Research on Socio Cultural Change this book combines rigour and readability and will be relevant to practitioners policy makers academics and engaged citizens A Practitioner's Guide to Stochastic Frontier Analysis Using Stata Subal C. Kumbhakar, Hung-Jen Wang, Alan P. Horncastle, 2015-01-26 A Practitioner's Guide to Stochastic Frontier Analysis Using Stata provides practitioners in academia and industry with a step by step guide on how to conduct efficiency analysis using the stochastic frontier approach The authors explain in detail how to estimate production cost and profit efficiency and introduce the basic theory of each model in an accessible way using empirical examples that demonstrate the interpretation and application of models This book also provides computer code allowing users to apply the models in their own work and incorporates the most recent stochastic frontier models developed in academic literature Such recent developments include models of heteroscedasticity and exogenous determinants of inefficiency scaling models panel models with time varying inefficiency growth models and panel models that separate firm effects and persistent and transient inefficiency Immensely helpful to applied researchers

this book bridges the chasm between theory and practice expanding the range of applications in which production frontier analysis may be implemented
