Step 3. PUMP

The bolt must be opened to pump gun. For greater safety, we recommend that the bolt remain open while pumping and that you close the bolt only when the barrel can be pointed in a safe direction. With the muzzle pointed in a safe direction, pump the gun the desired number of times up to 10. More power means greater chance of serious injury. Never put finger on trigger until ready to fire the gun. **NOTE:** Do not pump your gun more than 10 times. Muzzle energy increases produced by more than 10 pumps are minor, and increased pumping will damage your gun.

CAUTION: Be sure to grasp the forearm firmly as you close it to prevent it from snapping back and causing possible injury. Also be careful to keep fingers out of cocking mechanism when closing forearm. (See "Pinch Points", Fig. 4).

WARNING: Do not open the bolt, close the bolt, and then pull the trigger before pumping. This procedure can result in a loaded gun and a projectile being expelled from the gun during pumping. Recock the gun by opening the bolt and put "ON" trigger safety before pumping as in Steps 1 and 2.

We recommend the following number of pumps for different shooting conditions.

- For indoor shooting, 2 pumps.
- For 10-meter (33-ft.) distance, 4 to 6 pumps.
- For longer distances, 7 to 10 pumps.

NOTE: Never pump more than 10 times. Over pumping will cause serious damage to the gun.

	BBs	PELLETS
MUZZLE VELOCITY (10 PUMPS)	625 fps - 191 mps	605 fps - 184 mps
SHOOTING DISTANCE (10 PUMPS)	274 yds. - 251 m	265 yds. - 242 m

Filling the BB magazine for the PowerLine 35:

The loading door is located on the left side of receiver (Fig. 5). Push door down and fill magazine with approximately 50 BBs. Do not overfill or the feed system may not operate properly.

Fig. 5

Step 4. LOAD

LOADING BBs - (Fig. 6): With the bolt handle back and BBs in the magazine, RAISE the muzzle of the gun 45 degrees to 90 degrees. When raising the muzzle, be sure the front sight is pointed upward since the gun may not feed properly if it is on its side.

A BB can be seen on the magnetic tip by looking into the loading port. If a BB does not feed onto the magnetic tip when the muzzle is raised, shake the gun slightly. Push bolt handle fully forward and the BB is in firing position. Be sure the front sight is pointed upward when raising the muzzle to insure proper feeding.

Fig. 6

CAUTION: Always view the BB or Pellet when closing the bolt and loading port.

WARNING: BBs feed from the magazine by gravity which requires that the muzzle be raised. **NEVER ASSUME THE MAGAZINE OR CHAMBER IS EMPTY** even if the gun does not fire a projectile.

LOADING PELLETS: With the bolt back and BBs removed from the magazine (See "TO EMPTY MAGAZINE," Page 9), advance the bolt forward until the magnetic tip is visibly even with the rear edge of the pellet loading port; lower the muzzle and load a pellet, solid end forward (Fig. 7). Push the bolt handle fully forward and the pellet is chambered in the firing position.

IMPORTANT: Do not allow a pellet to fall into the rear of the loading port and become jammed in the BB feed hole. If this occurs, have a qualified gunsmith remove the left receiver and clear the loading port or return gun to Daisy.

IMPORTANT: Care must be exercised when shooting pellets while the magazine contains BBs. Loading a BB and pellet at the same time may result in a jammed or obstructed barrel.
