- 5** Grease the steel thrust washer (A-727) and slide it onto the output shaft until its splines align.

- 6** Lubricate the individual pinion gears with transmission fluid or special assembly fluid; grease the gear teeth and the wear surface on the planetary body and "rotate" it into the rear annulus gear. It fits almost even with the low-reverse drum's outer flange.

- 7** To be sure that it stays on, lightly grease both sides of the thrust washer and install it on the rear planetary.

- 8** Lubricate the inner bushings and teeth of the sun gear and grease the steel thrust plate. Rotate and slide it onto the output shaft.

- 9** As with other thrust washers, lightly grease both sides to hold them in place and place the tabs in the three recesses or holes of the sun gear shell.
