**Being and the Screen** Stephane Vial, 2019-11-12 How digital technology is profoundly renewing our sense of what is real and how we perceive Digital technologies are not just tools they are structures of perception They determine the way in which the world appears to us For nearly half a century technology has provided us with perceptions coming from an unknown world The digital beings that emerge from our screens and our interfaces disrupt the notion of what we experience as real thereby leading us to relearn how to perceive In *Being and the Screen* St phane Vial provides a philosophical analysis of technology in general and of digital technologies in particular that relies on the observation of experience phenomenology and the history of technology epistemology He explains that technology is no longer separate from ourselves if it ever was Rather we are as much a part of the machine as the machine is part of us Vial argues that the so called difference between the real and the virtual does not exist and never has We are living in a hybrid environment which is both digital and nondigital online and offline With this book Vial endows philosophical meaning to what we experience daily in our digital age In *A Short Treatise on Design* Vial offers a concise introduction to the discipline of design not a history book but a book built of philosophical problems developing a theory of the effect of design This book is published with the support of the University of N mes France
