Colour Notes For Children:

Colour Notes for Children Clare Newbolt, 2006-10-01 Colour notes for children is both a classroom guide for teachers and an exciting visual record of what Clare has done and other teachers might do with young children who are beginning to explore the world around them and who are learning about the part that light and colour plays in their world The book includes suggestions for teaching activities that cover many aspects of the subject ranging from the origins of colour its effect on subject and shape the impacts of mixing colours and the associations that different colours have for different children Colour notes for children was created from work that Clare did with children at Primary schools in Cambridgeshire UK and Connecticut USA It provides an essential introduction to any child s early visual education Understanding Children's Drawings Cathy A. Charlotte Perkins Gilman L Frank Baum Stephen Crane Charles Chesnutt Gertrude Stein Nella Larsen and William Carlos Williams Chromographia argues that modern aesthetic techniques are inseparable from the theories and technologies that drove modern color Nicholas Gaskill shows how literature registered the social worlds within which chromatic technologies emerged and also experimented with the ideas about perception language and the sensory environment that accompanied their proliferation Chromographia is the only study of modern color in U S literature It presents a new reading of perception in literature and a theory of experience that uses color to move beyond the usual divisions of modern thought Children's Catalog H.W.
