

Lab 4: Combining Forces

Group Members

Objective

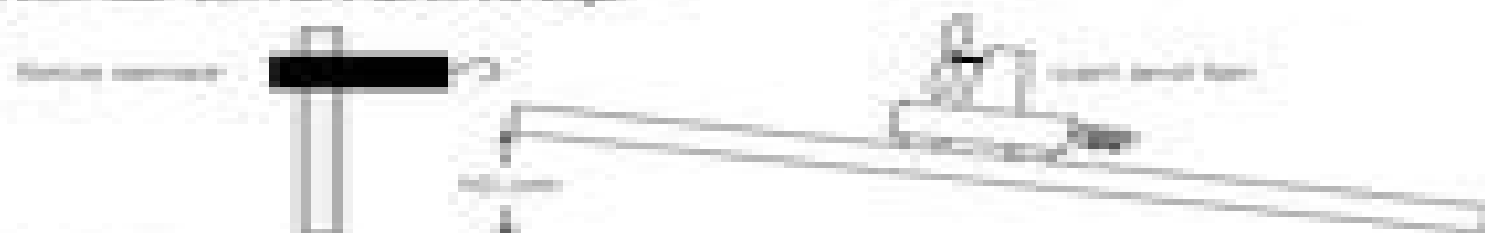

The purpose of this lab is to look at what happens when multiple forces act on an object and how they affect the motion of that object.

Equipment

Force sensor, cart and track with pulley, fan

Activity 1: One Force

Set up the track so that one end is about 10 cm above the other. Mount the force sensor using a force clamp. Mount the fan on top of the cart (check for four batteries that you will need). Release the cart from rest. (Don't let it fall off the edge.)

Questions

1. Released with the fan off, what is the direction of the acceleration? Sketch the acceleration vector in the following diagram. (The dot is the cart. The reference direction for is the direction down the ramp.)

2. Which direction is the fan force?

3. What force is the net force that acts, in other words, what force goes into the sum for the net force? For this entire lab, assume that there is no friction.
