

KEY ACCOMPLISHMENTS

- Darden's industry-leading food safety and total quality program continued to ensure that all 400 million meals served annually meet our stringent food safety and quality standards.
- Darden is pleased to have participated with industry regulators in developing a harmonized, Third Party Food Safety audit process for locally-sourced fresh produce, an expanding menu item, particularly at Darden's Seasons 52 and Capital Grille restaurants.

OUR APPROACH

There is no single issue more important to Darden than food safety. We serve more than 1 million meals each day made up of 2,000+ different ingredients and we are committed to ensuring every one of those ingredients meets our stringent food safety and quality standards. We have an international team of more than 50 biologists, food scientists and public health professionals dedicated to implementing and continually improving our industry-leading food safety/total quality program.

In Darden's view, the best way to ensure the safety of the food we purchase is to go directly to the source as well as to multiple points across the supply chain. Our objective is to have traceability from "pond to plate" or from "farm to fork." We use a risk-based, Hazard Analysis of Critical Control Points (HACCP) approach which provides the highest level of security across all levels of the supply chain. We employ 20 field plant inspectors in the United States and 8 other countries who inspect food plants, processes and products to verify they meet our standards before they are shipped. We also have 18 total quality managers in the field who, as registered sanitarians, review and certify in-restaurant food processes to ensure the integrity of the system all the way through to when the meal is delivered to the guest.

Animal welfare is another key food-related priority for Darden. As a purchaser of beef, poultry and pork, we believe ensuring the welfare of the animals in our supply chain is an ethical imperative guided by science. Darden has developed a set of Food Animal Welfare Principles and Policies and we have an Animal Welfare Working Group (AWWG) made up of Darden

representatives and external experts to continually monitor animal welfare issues and ensure we apply the standards within our supply chain. Our suppliers are required to certify their animal welfare practices and conduct third-party audits of their practices, and we conduct on-site assessments.

While we are confident of our industry-leading food safety and animal welfare programs, we also view both as processes of continual improvement. We are committed to engage with a wide range of stakeholders to advance our own knowledge and practices, as well as the science more broadly.

...we are committed to ensuring every one of those ingredients meets our stringent food safety and quality standards.
