Writing Dissertations and Theses in Psychology Stephen Haynes, John Hunsley, 2020-12-28 This accessible guide equips students to succeed in their master's thesis or doctoral dissertation in psychology. The authors provide concrete assistance to the myriad tasks and requirements that students will encounter as they plan, conduct, and present their dissertation or thesis research. Drawing upon their many years of experience in working with graduate students, the authors address the multiple stages of the dissertation and thesis process. They take you through drafting the proposal, the advisor-advisee relationship, interacting with committee members, the writing process, handling obstacles, and the final presentation. Chapters provide guidance on using a research team, collecting data, conducting a literature review, and even acquiring financial support. Finally, students will find additional resources such as practical information on copyright issues, research methods, case analyses, and teleconferencing. This is an essential book for both graduate psychology students working on their master's theses or doctoral dissertations and their advisors.

Millard, 2013-02-01 Because this book's main objective is to foster and promote student development, it should appeal to those who advise, counsel, and teach undergraduate and graduate students, particularly those in psychology education and other social sciences. Readers will find more than 90 articles in this book distributed across three significant challenges to students' development: the academic, occupational, and personal. Further, the material presented has been organized around three distinct approaches to these challenges: advising, career development, and field placement activities. The source for these articles is the official journal, *Teaching of Psychology*, of Division Two of the American Psychological Association.

Discourse Development S. A. Kuczaj, 2012-12-06 For some time now, the study of cognitive development has been far and away the most active discipline within developmental psychology. Although there would be much disagreement as to the exact proportion of papers published in developmental journals that could be considered cognitive, 50% seems like a conservative estimate. Hence, a series of scholarly books devoted to work in cognitive development is especially appropriate at this time. The Springer Series in Cognitive Development contains two basic types of books: namely, edited collections of original chapters by several authors and original volumes written by one author or a small group of authors. The flagship for

the Springer Series is a serial publication of the advances type carrying the subtitle Progress in Cognitive Development Research Each volume in the Progress sequence is strongly thematic in that it is limited to some well defined domain of cognitive developmental research e g logical and mathematical development development of learning All Progress volumes will be edited collections Editors of such collections upon consultation with the Series Editor may elect to have their books published either as contributions to the Progress sequence or as separate volumes All books written by one author or a small group of authors are being published as separate volumes within the series
