

Remote Control Transmitter Model #99020

Read and Save These Instructions

If you are installing multiple remote-controlled fans on the same circuit breaker, you may need to perform a few extra steps to prevent interference or faulty operation of your remote controls.

Go to www.HunterFan.com/FAQs and click "How do I properly install multiple remote-controlled fans?" for more information.

Installation

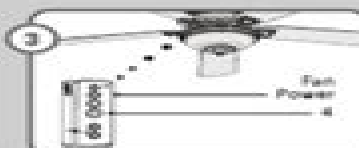

Installing or changing the battery: To access the battery compartment remove the small Phillips head screw that secures the battery door to the transmitter assembly. Starting at one of the corners of the door, pull upwards to remove door. Replace with a CR2032 battery when necessary. The battery should be installed with the positive (+) side up.

Before pairing your remote, the power must be turned off at the breaker box. Wait 5 seconds and then turn the power back on.

Pairing

Notes: The remote must be paired before the fan will operate. Within 3 minutes of restoring power to the fan, press both the power button and the 4 button for at least 3 seconds. The fan will turn at the lowest speed signifying that the remote pairing process is complete. If using the transmitter with multiple fans, repeat this process for each fan.

Operations

The power button found on the right side of the transmitter turns the fan off. The LED light will illuminate when a button is pushed, letting you know that the signal has been sent to the fan.

Buttons one (1) through (4) turn on the fan and control the speed.

- (1) Extra Low
- (2) Low
- (3) Medium
- (4) High

The up arrow and down arrow buttons control the lights on the fan. Quickly press the up or down arrow to turn the lights off and on. Hold the up or down arrow to raise or dim the light level.

Move the reverse switch to opposite position to change the direction of airflow. The fan must be running to use the reversing feature.

Your Universal Remote comes with wall plates that have two (2) posts on which to mount your transmitter when not in use.

- Press the fan power button off for at least three seconds to initiate the Safe-Exit Mode.
- The lights will flash for visual confirmation.

- The lights will stay on 50% brightness for 20 seconds and then begin to dim. After a total of 30 seconds, the lights will be completely off.
- Notes:** For CFL lighting, the lights will stay on 100% brightness for 30 seconds. After a total of 30 seconds, the lights will be completely off.

Troubleshooting
