Assessment Methods in Statistical Education Penelope Bidgood, Neville Hunt, Flavia Jolliffe, 2010-03-10 *Assessment Methods in Statistical Education* An International Perspective provides a modern international perspective on assessing students of statistics in higher education It is a collection of contributions written by some of the leading figures in statistical education from around the world drawing on their personal teaching experience and educational research The book reflects the wide variety of disciplines such as business psychology and the health sciences which include statistics teaching and assessment The authors acknowledge the increasingly important role of technology in assessment whether it be using the internet for accessing information and data sources or using software to construct and manage individualised or online assessments Key

Features Presents successful assessment strategies striking a balance between formative and summative assessment individual and group work take away assignments and supervised tests Assesses statistical thinking by questioning students ability to interpret and communicate the results of their analysis Relates assessment to the real world by basing it on real data in an appropriate context Provides a range of individualised assessment methods including those that deter plagiarism and collusion by providing each student with a unique problem to solve or dataset to analyse This book is essential reading for anyone involved in teaching statistics at tertiary level or interested in statistical education research **The Teaching and Learning of Statistics** Dani Ben-Zvi,Katie Makar,2015-12-24 This book presents the breadth and diversity of empirical and practical work done on statistics education around the world A wide range of methods are used to respond to the research questions that form its base Case studies of single students or teachers aimed at understanding reasoning processes large scale experimental studies attempting to generalize trends in the teaching and learning of statistics are both employed Various epistemological stances are described and utilized The teaching and learning of statistics is presented in multiple contexts in the book These include designed settings for young children students in formal schooling tertiary level students vocational schools and teacher professional development A diversity is evident also in the choices of what to teach curriculum when to teach learning trajectory how to teach pedagogy how to demonstrate evidence of learning assessment and what challenges teachers and students face when they solve statistical problems reasoning and thinking

International Handbook of Research in Statistics Education Dani Ben-Zvi,Katie Makar,Joan Garfield,2017-12-08 This handbook connects the practice of statistics to the teaching and learning of the subject with contributions from experts in several disciplines Chapters present current challenges and methods of statistics education in the changing world for statistics and mathematics educators Issues addressed include current and future challenges in professional development of teachers use of technology tools design of learning environments and appropriate student assessments This handbook presents challenging and inspiring international research perspectives on the history and nature current issues and future directions of statistics education and statistics education research International Perspectives on Teaching and Learning for Mathematical Literacy ,2024-10-02 Mathematics plays an important role in today's world and is used in daily life more than is often appreciated Mathematical literacy denotes the competence to deal with the mathematical issues of life in modern society The underlying purpose of this book is to support the development of rich understandings and practices of how an education for mathematical literacy can be realised The collected works emerging from several educational systems offer a fresh perspective on mathematical literacy and the chapters include practical examples that teachers pre service teachers and teacher educators might adapt to their own needs Teaching Mathematics in Grades 6 - 12 Randall E. Groth,2012-08-10 A journey into the vibrant and intriguing world of mathematics education Teaching Mathematics in Grades 6 12 explores how research in mathematics education can inform teaching practice in grades 6 12 The author shows

secondary mathematics teachers the value of being a researcher in the classroom by constantly experimenting with methods for developing students mathematical thinking and then connecting this research to practices that enhance students understanding of the material The chapters in Part I introduce secondary teachers to the field of mathematics education with cross cutting issues that apply to teaching and learning in all mathematics content areas The chapters in Part II are devoted to specific mathematics content strands and describe how students think about mathematical concepts The goal of the text is to have secondary math teachers gain a deeper understanding of the types of mathematical knowledge their students bring to grade 6 12 classrooms and how students thinking may develop in response to different teaching strategies

Statistics in Early Childhood and Primary Education Aisling Leavy, Maria Meletiou-Mavrotheris, Efi Paparistodemou, 2018-07-23 This compilation focuses on the theory and conceptualisation of statistics and probability in the early years and the development of young children s ages 3 10 understanding of data and chance It provides a comprehensive overview of cutting edge international research on the development of young learners reasoning about data and chance in formal informal and non formal educational contexts The authors share insights into young children s statistical and probabilistic reasoning and provide early childhood educators and researchers with a wealth of illustrative examples suggestions and practical strategies on how to address the challenges arising from the introduction of statistical and probabilistic concepts in pre school and school curricula This collection will inform practices in research and teaching by providing a detailed account of current best practices challenges and issues and of future trends and directions in early statistical and probabilistic learning worldwide Further it will contribute to future research and theory building by addressing theoretical epistemological and methodological considerations regarding the design of probability and statistics learning environments for young children
