impairment behind theories of military science Biological and Chemical Terrorism Raymond S. Weinstein, 2003 Biological Chemical Terrorism is a practical manual to assist directors of pharmacy and their staff in the establishment and operation of a bioterrorism preparedness program **Dual Use Science and Technology, Ethics and Weapons of Mass Destruction** Seumas Miller, 2018-05-22 This book deals with the problem of dual use science research and technology It first explains the concept of dual use and then offers analyses of collective knowledge and collective ignorance It goes on to present a theory of collective responsibility followed by four chapters focusing on a particular scientific field or industry of dual use concern the chemical industry the nuclear industry cyber technology and the biological sciences The problem of dual use science research and technology arises because such research and technology has the potential to be used for great evil as well as for great good On the one hand knowledge is a necessary condition and perhaps a constitutive feature of technologies that contribute greatly to individual and collective well being Consider for example nuclear technology that enables the generation of low cost electricity in populations without obvious alternative energy sources So technological knowledge is a good thing and ignorance of it a bad thing On the other hand these same technologies can be extremely harmful to individuals and collectives as with the atomic bombs dropped on Hiroshima and Nagasaki So at least with respect to some technologies evidently knowledge is a bad thing and ignorance a good thing Accordingly the question arises as to whether we ought to limit scientific research and or the development of technology and if so which research or technology in what manner and to what extent This book examines the answer to that question *Science and Technology Policies for the Anti-Terrorism Era* A.D. James, 2006-09-12 Considers the science and technology policies necessary for defense against terrorism and other threats to security assesses the priorities for governments universities national laboratories and industrial firms and identifies how governments and the science and technology community can most effectively work together to enhance our security
