Slabaugh, 2007 The Sixth Edition of this accurate and well tested lab manual contains 15 general chemistry and 20 organic/biochemistry safety scale laboratory experiments. The experiments are designed to use small quantities of chemicals and emphasize safety and proper disposal of materials. Safety scale is the authors' term for describing the amount of chemicals each lab experiment requires less than macroscale quantities which are expensive and hazardous and more than microscale quantities which are difficult to work with and require special equipment. This lab manual provides a unique blend of laboratory skills and exercises that effectively illustrate concepts from the main text.
