Collecting Garbage Dirty Work Clean Jobs Proud People

**RAYMOND;PERRY RUSSELL (STEWART
E.)**

Collecting Garbage Dirty Work Clean Jobs Proud People:

Collecting Garbage Stewart Perry, 2017-11-30 Roosevelt and Howe is a joint biography of Franklin D Roosevelt and one of his principal advisors Louis Howe was not only FDR's first political aide but the only one who also became an intimate personal friend Other than Harry Hopkins in the late 1930s he was the only advisor whom Roosevelt trusted completely to serve his interests without distracting personal ambition or a shadowy private agenda This book is the story of their separate early lives of the rare chances which brought them together and of their totally intertwined careers after 1912 *Collecting Garbage* RAYMOND; PERRY RUSSELL (STEWART E.), 2017 *Not Just Green, Not Just White* Mary E. Mendoza, Traci Brynne Voyles, 2025-02 Not Just Green Not Just White brings together a group of diverse contributors to explore the rich intersections between race and environment Together these contributors demonstrate that the field of environmental history with its core questions and critical engagement with the nonhuman world provides a fertile context for understanding racism and ongoing colonialism as power structures in the United States Earlier historiography has defined environmental history as the study of the changing relationships between humans and the environment or nature This volume aims to redefine the field arguing that neither humans nor environment is a monolithic actor in any given story Both humans and the environment are diverse and often the environment causes conflict between and among peoples leaving unequal access and power in its wake Just as important these histories often reveal how despite unequal power those who carry less privilege still persist Together these essays demonstrate the promise of the field of environmental history and reveal how when practitioners in the field decide to move away from green and white topics they will be able to explain much more about our collective past than anyone ever imagined *Work, Labour and Cleaning* Lotika Singha, 2019-07-24 The outsourcing of domestic work in the UK has been steadily rising since the 1970s but there has been little research into White British women who work as independent providers of cleaning services *Work Labour and Cleaning* is a cross cultural analysis based on new research into two particular social contexts one in the UK and one in India It argues that outsourced domestic cleaning can be undertaken either as work using mental and manual skills or as labour usually defined as unskilled natural women's work depending on the social context and working conditions in which it occurs The book challenges feminist dogma and popular myths about housework **Clean and White** Carl A Zimring, 2014-09-26 A comprehensive and provocative exploration of environmental racism from the founding of the republic until the 1960s *American Historical Review* *Clean and White* offers a history of environmental racism in the United States focusing on constructions of race and hygiene In the wake of the civil war as the nation encountered emancipation mass immigration and the growth of an urbanized society Americans began to conflate the ideas of race and waste Certain immigrant groups took on waste management labor fostering connections between the socially marginalized and refuse Ethnic purity was tied to pure cleanliness and hygiene became a central aspect of white identity In *Clean and White* Carl A Zimring draws on historical evidence from statesmen scholars sanitarians novelists

activists advertisements and the United States Census of Population to reveal changing constructions of environmental racism The material consequences of these attitudes endured and expanded through the twentieth century shaping waste management systems and environmental inequalities that endure into the twenty first century Today the bigoted idea that non whites are dirty remains deeply ingrained in the national psyche continuing to shape social and environmental inequalities

The Politics of Trash Patricia Strach, Kathleen S. Sullivan, 2023-01-15 The Politics of Trash explains how municipal trash collection solved odorous urban problems using nongovernmental and often unseemly means Focusing on the persistent problems of filth and the frustration of generations of reformers unable to clean their cities Patricia Strach and Kathleen S Sullivan tell a story of dirty politics and administrative innovation that made rapidly expanding American cities livable The solutions that professionals recommended to rid cities of overflowing waste cans litter filled privies and animal carcasses were largely ignored by city governments When the efforts of sanitarians engineers and reformers failed public officials turned to the habits and tools of corruption as well as to gender and racial hierarchies Corruption often provided the political will for public officials to establish garbage collection programs Effective waste collection involves translating municipal imperatives into new habits and arrangements in homes and other private spaces To change domestic habits officials relied on gender hierarchy to make the women of the white middle class households in charge of sanitation When public and private trash cans overflowed racial and ethnic prejudices were harnessed to single out scavengers garbage collectors and neighborhoods by race These early informal efforts were slowly incorporated into formal administrative processes that created the public private sanitation systems that prevail in most American cities today The Politics of Trash locates these hidden resources of governments to challenge presumptions about the formal mechanisms of governing and recovers the presence of residents at the margins whose experiences can be as overlooked as garbage collection itself This consideration of municipal garbage collection reveals how political development often relies on undemocratic means with long term implications for further inequality Focusing on the resources that cleaned American cities also shows the tenuous connection between political development and modernization

Waste Away Joshua O. Reno, 2016-02-09 Though we are the most wasteful people in the history of the world very few of us know what becomes of our waste In *Waste Away* Joshua O Reno reveals how North Americans have been shaped by their preferred means of disposal sanitary landfill Based on the author's fieldwork as a common laborer at a large transnational landfill on the outskirts of Detroit the book argues that waste management helps our possessions and dwellings to last by removing the transient materials they shed and sending them elsewhere Ethnography conducted with waste workers shows how they conceal and contain other people's wastes all while negotiating the filth of their occupation holding on to middle class aspirations and occasionally scavenging worthwhile stuff from the trash *Waste Away* also traces the circumstances that led one community to host two landfills and made Michigan a leading importer of foreign waste Focusing on local activists opposed to the transnational waste trade with Canada the book

s ethnography analyzes their attempts to politicize the removal of waste out of sight that many take for granted Documenting these different ways of relating to the management of North American rubbish Waste Away demonstrates how the landfills we create remake us in turn often behind our backs and beneath our notice Cash For Your Trash Carl

Zimring,2005-09-06 Over the past two decades concern about the environment has brought with it a tremendous increase in recycling in the United States and around the world For many it has become not only a civic but also a moral obligation Long before our growing levels of waste became an environmental concern however recycling was a part of everyday life for many Americans and for a variety of reasons From rural peddlers who traded kitchen goods for scrap metal to urban children who gathered rags in exchange for coal individuals have been finding ways to reuse discarded materials for hundreds of years In Cash for Your Trash Carl A Zimring provides a fascinating history of scrap recycling from colonial times to the present Moving beyond the environmental developments that have shaped modern recycling enterprises Zimring offers a unique cultural and economic portrait of the private businesses that made large scale recycling possible Because it was particularly common for immigrants to own or operate a scrap business in the nineteenth century the history of the industry reveals much about ethnic relationships and inequalities in American cities Readers are introduced to the scrapworkers brokers and entrepreneurs who like the materials they handled were often marginalized Integrating findings from archival industrial and demographic records Cash for Your Trash demonstrates that over the years recycling has served purposes far beyond environmental protection Its history and evolution reveals notions of Americanism the immigrant experience and the development of small business in this country **Leaving Spain** Mê-Linh Riemann,2022-06-01 Life histories and

experiences of Spanish migrants Since the beginning of the economic crisis of 2008 Spain like other Southern European countries has witnessed a mass departure of mostly young people looking for opportunities abroad Leaving Spain is based on 58 autobiographical narrative interviews with recent Spanish migrants who went to the UK and Germany and sometimes returned By presenting a combination of in depth case studies and comparative analyses the author demonstrates the potential of biographical research and narrative analysis in studying contemporary Europe including its overlapping crises The scope of the sociological study is not limited to examining how those who left Spain experienced single phases of their migration Instead it focuses on the significance of migration projects in the context of their life histories and how they make sense of these experiences in retrospect This book will not only be of great interest to social scientists and students in different disciplines and interdisciplinary studies such as sociology anthropology human geography European studies education and social work but also to professionals European and national policy makers and those interested in learning more about migrants experiences perspectives and often invisible contributions **Technology and the Environment in History** Sara B. Pritchard,Carl A. Zimring,2020-10-13 New perspectives on how envirotech can help us engage with the surrounding world in ways that are more sustainable for humanity and the planet Today s scientists policymakers and

citizens are all confronted by numerous dilemmas at the nexus of technology and the environment Every day seems to bring new worries about the dangers posed by carcinogens superbugs energy crises invasive species genetically modified organisms groundwater contamination failing infrastructure and other troubling issues In *Technology and the Environment in History* Sara B Pritchard and Carl A Zimring adopt an analytical approach to explore current research at the intersection of environmental history and the history of technology an emerging field known as envirotech *Technology and the Environment in History* They discuss the important topics historical processes and scholarly concerns that have emerged from recent work in thinking about envirotech Each chapter focuses on a different urgent topic Food and Food Systems How humans have manipulated organisms and ecosystems to produce nutrients for societies throughout history Industrialization How environmental processes have constrained industrialization and required shifts in the relationships between human and nonhuman nature Discards What we can learn from the multifaceted forms complex histories and unexpected possibilities of waste Disasters How disaster which the authors argue is common in the industrialized world exposes the fallacy of tidy divisions among nature technology and society Body How bodies reveal the porous boundaries among technology the environment and the human Sensescape How environmental and technological change have reshaped humans and potentially nonhumans sensory experiences over time Using five concepts to understand the historical relationships between technology and the environment porosity systems hybridity biopolitics and environmental justice Pritchard and Zimring propose a chronology of key processes moments and periodization in the history of technology and the environment Ultimately they assert envirotechnical perspectives help us engage with the surrounding world in ways that are we hope more sustainable and just for both humanity and the planet Aimed at students and scholars new to environmental history the history of technology and their nexus this impressive synthesis looks outward and forward identifying promising areas in more formative stages of intellectual development and current synergies with related areas that have emerged in the past few years including environmental anthropology discard studies and posthumanism
