whatever level that may be Simply put today s high school graduates need a broad based education that combines an array of knowledge skills and experiences to prepare them for life after high school And indeed state s definitions of college and career readiness have broadened in recent years to include a variety of skills and dispositions such as critical thinking skills social emotional skills such as collaboration and interpersonal skills such as resilience and perseverance English Rasmussen Cushing Therriault 2016 The Every Student Succeeds Act ESSA of 2015 the key federal K 12 legislation explicitly supports the notion of a well rounded student emphasizing readiness in areas beyond its predecessor s the No Child Left Behind Act or NCLB focus on core academic content ESSA mandates that states ensure that students are provided an enriched accelerated curriculum beyond courses and content areas in which state assessments are given e g mathematics reading and that is aligned with the postsecondary experiences students are likely to encounter ESSA also supports an expansion of readiness goals through provisions for the improvement of conditions for student learning that support social emotional learning intrapersonal skills and other employability skills And ESSA includes provisions in states accountability systems that support emphasis on broader definitions of readiness Additionally ESSA s accountability framework includes important principles for supporting a broader definition of what students need to know and be able to do once they graduate high school Accountability systems under ESSA may include multiple measures of college and career readiness Indeed several states had already added a career focused indicator prior to ESSA passing such as pathway completion or technical assessment achievement to their accountability systems and the number of states publicly reporting such indicators continues to increase Achieve AdvanceCTE 2016 As definitions and measures of college and career readiness continue to evolve we know one thing for sure we need to better prepare ALL students for success after high school This book explores the ways in which some education researchers are approaching this task *Getting Ready for College, Careers, and the Common Core* David T. how to help all students be ready for learning beyond high school **African American Students' Career and College Readiness** Jennifer R. Curry, M. Ann Shillingford, 2015-10-08 College and career readiness is essential to promoting the success of all students. Educational and economic changes in today's society demand well thought out strategies for preparing students to survive academically, socially, and financially in the future. African American students are at a disadvantage in this strategic planning process due to a long history of racism, injustice, and marginalization. *African American Students' Career and College Readiness: The Journey Unraveled* explores the historical, legal, and socio-political issues of education affecting African American students and their career and college readiness. Each chapter has been written based on the authors' experience and passion for the success of students in the African American population. Some of the chapters will appear to be written in a more conversational and idiomatic tone, whereas others are presented in a more erudite format. Each chapter, however, presents a contextual portrayal of the contemporary and often dysfunctional pattern of society's approach to supporting this population. Contributors also present progressive paradigms for future achievements. Through the pages of this book, readers will understand and hopefully appreciate what can be done to promote positive college-bound self-efficacy, procurement of resources in the high school to college transition, exposure and access to college possibilities, and implications for practice in school counseling, education leadership, and higher education.

Academic Moves for College and Career Readiness, Grades 6-12 Jim Burke, 2015-02-03 Depth matters. Can a mere fifteen words turn today's youth into the innovative, ambitious thinkers we need? Yes, contend Jim Burke and Barry Gilmore, because these are the moves that make the mind work, and students must learn if they're to achieve academically. With *Academic Moves*, Jim and Barry distill each of these 15 powerhouse processes into a potent concision that nevertheless spans core subject areas. Before, during, and after sections offer essential questions, lesson ideas, and activities. Student samples illustrate what to look for, and the process for getting there. Culminating tasks include producing an analytic essay, argument, and more. Reproducible rubrics assist with assessment.
