Manual of Adult and Paediatric Medical Oncology S. Monfardini, K. Brunner, D. Crowther, S. Eckhardt, D. Olive, S. Tanneberger, A. Veronesi, J.M.A. Whitehouse, R. Wittes, 2012-12-06 It is a very special honour for me to be able to present this handbook of medical oncology which under diverse headings and origins covers such a vast spectrum of experience I believe the reader will be struck in particular by the impressive volume of information available especially with regard to childhood tumours which represent today an immense laboratory of hope It is in this very field that we oncologists have been able to obtain the most consoling results in recent years I feel sure that all those who read these chapters will find that their oncological competence is enriched and also in a certain sense that their wish to contribute to progress in cancer research and treatment has been renewed In conclusion my most heartfelt congratulations go to the authors for the excellent job they have done as well as my admiration for having been able to concentrate so much precious and innovative information into so little space Umberto Veronesi Preface Since 1976 the VICC has been holding chemotherapy courses in all parts of the world excluding North America and Australia The Manual of Cancer Chemotherapy originally devised as a didactic tool to be used by course participants expanded itself in the successive editions to a comprehensive although schematic textbook of medical oncology
