Russell C. Hibbeler

De Planeet Mechanica:

Collected Papers H. A. Lorentz, 2012-12-06 With the present ninth volume we bring to a conclusion the edition of the Collected Papers of Professor H A Lorentz It contains the evidence of his constant activity to promote the interest in science of a larger public in particular of his country men by addresses on several occasions by articles in magazines and newspapers and other wise In a certain way in this part of his work he belongs more particularly to his country therefore we reproduce it in the original language with the exception of his inaugural address as Leiden professor early in 1878 which readers abroad might be interested in The sketch of Ludwig Boltzmann in the German language contains a most powerful and deep going survey of the scientific work of this genius In several places the character of the man's personality rather than that of the scientist reveals itself his attitude towards various problems and his personal views In his first address he refers to the value of mathematics we hear his dislike for too vivid visual speculations and crude hypotheses his taste for the soberness of mathematical formulae where he argues that the fundamental principles must needs escape further explanation On page 54 we read what he said about determinism and on page 181 he expresses himself on the relation of matter and mind His intimate feelings on space and time and the aether are touched upon on pages 240 261 274

De Mechanisering Van Het Wereldbeeld Eduard J. Dijksterhuis, 2006-07-20 De mechanisering van het wereldbeeld is het standaardwerk van Dijksterhuis waarin hij op glasheldere wijze de ontwikkeling van het wetenschappelijk denken analyseert van de Griekse natuurfilosofen tot de wijsgeren op wier denkbeelden de moderne natuurwetenschappen steunen Huygens Descartes Boyle Newton De natuurwetenschappen hebben een onvoorstelbare invloed uitgeoefend op de samenleving maar het wereldbeeld van de natuurwetenschap spoort niet altijd met de manier waarop mensen zin en betekenis aan hun bestaan geven Natuurwetenschap en techniek zijn een cultureel probleem van de eerste orde geworden dat geen enkel mens onverschillig kan laten De opkomst van het mechanistisch denken heeft de grote vlucht van de natuurwetenschap en de techniek voorbereid en de analyse van Dijksterhuis is verplichte lectuur voor iedereen die zich in de problemen wil verdiepen Deze uitgave is uitgebreid met een nawoord van Dijksterhuis biograaf prof dr K van Berkel

Mechanica voor technici - Dynamica, 3/e Russell C. Hibbeler, 2006 **Surfing the Past** Olivier Nyirubugara, 2012 This book discusses one of the most frequently discussed subjects in history education during the last two decades namely how secondary school pupils use the World Wide Web for their learning activities Based on two case studies in two Dutch schools the book shows some ways in which the use of the Web has changed history education in at least three respects first the findings of the two case studies show that the Web has a huge potential to turn the history class previously described as

boring and too abstract into a livelier and more attractive environment where concepts events phenomena and processes of the past almost always have textual and or audio visual representations second strong indications were observed showing that the Web fosters historical understanding not only by triggering thinking processes that take pupils beyond the shown contents but also by prompting them to evaluate sources and sample relevant fragments for their assignments third the Web has brought into history education sources that were previously excluded including those described as unconventional This book shows among other things that convergence is underway on both the user side since pupils use both conventional and unconventional online sources and the content production side where heritage institutions are increasingly getting involved in unconventional platforms like Wikipedia The latter emerged from the two case studies as the most popular source of historical information while the websites of heritage institutions tended to appear at the bottom of the list of references Unlike personal sites which also scored better heritage sites face some obstacles including the still dominant desire to preserve institutions identity and uniqueness conservatism which often prevents the redefinition of collection management tasks and the tax payers dilemma For that reason collections are not hyperlinked and therefore remain invisible and not easy to find online
