Computer Recognition Systems 3 Advances In Intelligent And Soft Computing:

Computer Recognition Systems 2 Marek Kurzynski,Edward Puchala,Michal Wozniak,Andrzej Zolnierrek,2007-10-15

Computer recognition systems are nowadays one of the most promising directions in artificial intelligence This book presents actual comprehensive study of this field It contains a collection of over one hundred carefully selected articles contributed by experts of pattern recognition It reports on current research with respect to both methodology and applications In particular it includes the following sections Features learning and classifiers Image processing and computer vision Speech and word recognition Medical applications Various applications This book is a great reference tool for scientists who deal with the problems of designing computer pattern recognition systems Its target readers can be the as well researchers as students of computer science artificial intelligence or robotics

Computer Recognition Systems 3 Marek Kurzynski,Michal

Wozniak,2009-05-12 This book presents latest results in computer recognition systems pattern recognition machine learning web and data mining It includes coverage of image processing and computer vision speech and word recognition and medical applications

Advances in Artificial Intelligence, Software and Systems Engineering Tareq Z. Ahram,2018-06-28

This book focuses on emerging issues following the integration of artificial intelligence systems in our daily lives It focuses on the cognitive visual social and analytical aspects of computing and intelligent technologies highlighting ways to improve technology acceptance effectiveness and efficiency Topics such as responsibility integration and training are discussed throughout The book also reports on the latest advances in systems engineering with a focus on societal challenges and next generation systems and applications for meeting them It also discusses applications in smart grids and infrastructures systems engineering education as well as defense and aerospace The book is based on both the AHFE 2018 International Conference on Human Factors in Artificial Intelligence and Social Computing Software and Systems Engineering The Human Side of Service Engineering and Human Factors in Energy July 21 25 2018 Loews Sapphire Falls Resort at Universal Studios Orlando Florida USA

Soft Computing in Industrial Applications António Gaspar-Cunha,Ricardo Takahashi,Gerald Schaefer,Lino Costa,2011-04-27 The 15th Online World Conference on Soft Computing in Industrial Applications held on the Internet constitutes a distinctive opportunity to present and discuss high quality papers making use of sophisticated Internet tools and without incurring in high cost and thus facilitating the participation of people from the entire world The book contains a collection of papers covering outstanding research and developments in the field of Soft Computing including evolutionary computation fuzzy control and neuro fuzzy systems bio inspired systems optimization techniques and application of Soft Computing techniques in modeling control optimization data mining pattern recognition and traffic and transportation systems

Advances in Soft Computing Ildar Batyrshin,Grigori Sidorov,2011-11-22 The two volume set LNAI 7094 and 7095 constitutes the refereed proceedings of the 10th Mexican International Conference on Artificial Intelligence MICA 2011 held in Puebla Mexico in November December 2011 The 96 revised papers presented were carefully selected from XXX

submissions The second volume contains 46 papers focusing on soft computing The papers are organized in the following topical sections fuzzy logic uncertainty and probabilistic reasoning evolutionary algorithms and other naturally inspired algorithms data mining neural networks and hybrid intelligent systems and computer vision and image processing

Computer Recognition Systems 4 Robert Burduk, Marek Kurzynski, Michal Wozniak, Andrzej Zolnierrek, 2011-04-21 The computer recognition systems are nowadays one of the most promising directions in artificial intelligence This book is the most comprehensive study of this field It contains a collection of 78 carefully selected articles contributed by experts of pattern recognition It reports on current research with respect to both methodology and applications In particular it includes the following sections Biometrics Features learning and classifiers Image processing and computer vision Knowledge acquisition based on reasoning methods Medical applications Miscellaneous applications This book is a great reference tool for scientists who deal with the problems of designing computer pattern recognition systems Its target readers can be as well researchers as students of computer science artificial intelligence or robotics

7th International Conference on Practical Applications of Agents and Multi-Agent Systems (PAAMS'09) Yves Demazeau, Juan Pavón, Juan Manuel Corchado Rodríguez, Javier Bajo, 2009-03-08 PAAMS the International Conference on Practical Applications of Agents and Multi Agent Systems is an evolution of the International Workshop on Practical Applications of Agents and Multi Agent Systems PAAMS is an international yearly tribune to present to discuss and to disseminate the latest developments and the most important outcomes related to real world applications It provides a unique opportunity to bring multi disciplinary experts academics and practitioners together to exchange their experience in the development of Agents and Multi Agent Systems This volume presents the papers that have been accepted for the 2009 edition These articles capture the most innovative results and this year s trends Assisted Cognition E Commerce Grid Computing Human Modelling Information Systems Knowledge Management Agent Based Simulation Software Development Transports Trust and Security Each paper has been reviewed by three different reviewers from an international committee composed of 64 members from 20 different countries From the 92 submissions received 35 were selected for full presentation at the conference and 26 were accepted as posters

Man-Machine Interactions Krzysztof A. Cyran, Stanislaw Kozielski, James F. Peters, Urszula Stanczyk, Alicja Wakulicz-Deja, 2009-10-01 This volume reflects a number of research streams on the development of computer systems and software that makes it possible to employ them in a variety of human activities ranging from logic studies and artificial intelligence rule based control of technological processes image analysis expert systems and decision support to assistance in creative works In particular the volume points to a number of new advances in man machine communication interaction between visualization and modeling rough granular computing in human centric information processing and the discovery of affinities between perceptual granules The topical subdivisions of this volume include human computer interactions decision support rough fuzzy investigations advances in classification methodology pattern analysis and signal processing computer
