Consanguinity In Context Cambridge Studies In Biological And Evolutionary Anthropology:

Consanguinity in Context Alan H. Bittles, 2012-05-24 An essential guide to this major contemporary issue Consanguinity in Context is a uniquely comprehensive account of intra familial marriage Detailed information on past and present religious social and legal practices and prohibitions is presented as a backdrop to the preferences and beliefs of the 1100 million people in consanguineous unions Chapters on population genetics and the role of consanguinity in reproductive behaviour and genetic variation set the scene for critical analyses of the influence of consanguinity on health in the early years of life The discussion on consanguinity and disorders of adulthood is the first review of its kind and is particularly relevant given the ageing of the global population Incest is treated as a separate issue with historical and present day examples examined The final three chapters deal in detail with practical issues including genetic testing education and counselling national and international legislation and imperatives and the future of consanguineous marriage worldwide Consanguinity in Context Alan Holland Bittles, 2012 An essential guide to the sensitive topic of cousin marriage examining its social medical political and legal connotations **Routledge Handbook of Religious Laws** Silvio Ferrari, Rossella Bottoni, 2019-04-09 Much has been written on specific religious legal systems yet substantial comparative studies that strive to compare systems identifying their analogies and differences have been relatively few This absence undermines the capacity to understand religions and becomes particularly serious when the faithful of these religions live together in the same geographical space as happens today with increasing frequency Both interreligious dialogue and dialogue between States and religions presuppose a set of data and information that only comparative research can provide This book seeks to address this gap in the literature by presenting a comparative analysis of Christian Jewish Islamic and Hindu laws and traditions Divided into five parts the first part of the book offers the historical background for the legal analysis that is developed in the subsequent parts Part II deals with the sources of law in the four religions under discussion Part III addresses the dynamics of belonging and status and Part IV looks at issues relating to the conclusion of marriage and its dissolution The fifth and final part discusses how each religion views the legal other Each part concludes with exploring what we can learn from a comparative examination of the topic that is dealt with in that part Written by leading experts in the field this book presents a clear and comprehensive picture of key religious legal systems along with a substantial bibliography It provides a state of the art overview of scholarship in this area accompanied by a critical evaluation As such it will be an invaluable resource for all those concerned with religious legal systems multiculturalism and comparative law **Demographic Transitions, Health, and Well-Being** Pedro Miguel Gaspar, David Facal, Esperanza Navarro-Pardo, Veland Ramadani, 2025-10-10 Demographic transitions including migratory flows and global ageing increasingly affect the activity of many countries on different continents The impacts of this on the health and well being of societies seem to be a growing source of concern Interventions in physical and cognitive health will open new paths of development of societies This book explores the interconnection

amongst demographic transition health and well being Featuring selected contributions presented at the 2025 International Conference on Demographic Transition Health and Technologies ICDTHT25 held in Salinas Ecuador the contents of this book explore issues such as aging population migration physical health and cognitive health as well as new approaches and innovations for the well being of societies It provides researchers scholars students and academics with an interdisciplinary contribution to research on demographic transition health and well being

Skeletal Biology of the Ancient Rapanui (Easter Islanders) Vincent H. Stefan,George W. Gill,2016-01-07 A succinct volume presenting current views of Rapanui prehistory utilising biological evidence to modify existing archaeological and cultural anthropological preconceptions

The Foragers of Point Hope Charles E. Hilton,Benjamin M. Auerbach,Libby W. Cowgill,2014-07-24 On the edge of the Arctic Ocean above the Arctic Circle the prehistoric settlements at Point Hope Alaska represent a truly remarkable accomplishment in human biological and cultural adaptations Presenting a set of anthropological analyses on the human skeletal remains and cultural material from the Ipiutak and Tigara archaeological sites The Foragers of Point Hope sheds new light on the excavations from 1939 41 which

provided one of the largest sets of combined biological and cultural materials of northern latitude peoples in the world. A range of material items indicated successful human foraging strategies in this harsh Arctic environment. They also yielded enigmatic artifacts indicative of complex human cultural life filled with dense ritual and artistic expression. These remnants of past human activity contribute to a crucial understanding of past foraging lifeways and offer important insights into the human condition at the extreme edges of the globe.
