of Fire and Emergency Service Administration model curriculum Build the next generation of great fire service leaders with the Third Edition of Fire Officer Principles and Practice A Human Error Approach to Aviation Accident Analysis Douglas A. Wiegmann, Scott A. Shappell, 2017-12-22 Human error is implicated in nearly all aviation accidents yet most investigation and prevention programs are not designed around any theoretical framework of human error Appropriate for all levels of expertise the book provides the knowledge and tools required to conduct a human error analysis of accidents regardless of operational setting i e military commercial or general aviation The book contains a complete description of the Human Factors Analysis and Classification System HFACS which incorporates James Reason s model of latent and active failures as a foundation Widely disseminated among military and civilian organizations HFACS encompasses all aspects of human error including the conditions of operators and elements of supervisory and organizational failure It attracts a very broad readership Specifically the book serves as the main textbook for a course in aviation accident investigation taught by one of the authors at the University of Illinois This book will also be used in courses designed for military safety officers and flight surgeons in the U S Navy Army and the Canadian Defense Force who currently utilize the HFACS system during aviation accident investigations Additionally the book has been incorporated into the popular workshop on accident analysis and prevention provided by the authors at several professional conferences world wide The book is also targeted for students attending Embry Riddle Aeronautical University which has satellite campuses throughout the world and offers a course in human factors accident investigation for many of its majors In addition the book will be incorporated into courses offered by Transportation Safety International and the Southern California Safety Institute Finally this book serves as an excellent reference guide for many safety professionals and investigators already in the field **Man-Machine-Environment**
