Sustainable

Development and Corporate Social Responsibility Dongyong Zhang, Stephen Morse, Uma Kambhampati, 2017-11-06

Corporate Social Responsibility CSR has become an important concept in the last few decades. Although it originated in the developed countries of the West, the concept has been embraced and adapted by corporations and policy making agencies in many developing countries. Not surprisingly, given the importance of growth and development as policy objectives in these countries, CSR has had a significant impact on sustainable development. Sustainable Development and Corporate Social Responsibility explores the evolution of CSR across the developed and developing world with a particular focus on China and sustainable development. Through an extensive review of the literature and relevant case studies, the book examines whether CSR can make a contribution to sustainable development, how the patterns of CSR in developed Western economies compare to that in the rapidly growing economy of China, what trade offs take place between CSR and economic growth, as well as the future of CSR and its possible impact on the global sustainable development agenda. This book is a valuable resource for academics and upper level undergraduate and postgraduate students in the fields of human social geography, economics, business studies, sustainable development, development studies, and environmental studies.

Pathways to a Sustainable Economy Moazzem Hossain, Robert Hales, Tapan Sarker, 2017-10-24. The focus of this edited volume is to identify challenges facing organizations in achieving zero greenhouse gas emissions by 2050 and a new energy economy, and to explore solutions from various sectors of the economy to enable the transition to a zero emissions future. Research presented here is divided into three parts with an introductory statement on growth and sustainability. Part one discusses strategies towards a sustainable economy under a zero emissions goal. Part two contains industry specific case studies focusing on construction and related activities. Part three is devoted to country specific case studies from the Asia Pacific region. Each of the chapters address one or more of the following issues: restoration, mitigation, adaptation, and/or promoting resilience in the face of climate change as part of achieving a sustainable economy. The volume is multi-disciplinary in nature, drawing on various disciplines in social science, business, environment, and policy, and will be of interest to UN development agencies, academic institutions, government policy makers, NGOs, and business leaders.
