Confronting Global Neoliberalism Third World Resistance And Development Strategies:

Confronting Global Neoliberalism Patrick Bond, Paul Clooney, 2011-02-28 With the world's attention fixed on the travails of leading global economies due to a still unfolding financial crisis of gigantic proportions there has been a studied silence on the fate of the third world as the malaise increasingly impacts it This silence is particularly disturbing because questions of potential pitfalls in the neoliberal policy package which the third world unlike Western Europe and Japan was largely forced to adopt were never countenanced as One third world state after another discovered that international institutions were in effect hostile to their governments if they chose alternative developmental models or otherwise resisted the neoliberal triage of liberalization privatization and deregulation This collection is a tour de force effectively countering not only the neoliberal ideology of development as a whole but the marginalizing within today's mainstream crisis discourse of any discussion of the monstrous misallocation of global resources wrought by the so called Washington Consensus and the suffering and destruction it has wreaked on third world peoples and economies This edited volume is intended as both a textbook for introductory classes in global development or area studies and as a conduit for advanced students policymakers NGO activists and an educated readership to gain knowledge about the socio economic conditions existing across much of the world we live in and the policies that brought them about The specially commissioned and peer reviewed chapters are written by experts in the fields of economics politics sociology and international studies Chapter authors hail from around the world including Brazil Mexico Canada United States United Kingdom South Africa South Korea and Thailand The countries regions neoliberal experience and potential futures covered in this book are Brazil China Cuba Egypt Mexico Southeast Asia Indonesia Malaysia and Vietnam South Africa South Korea Syria Thailand and Venezuela

Confronting Global Neoliberalism Richard Westra, 2010 This collection is a tour de force an effective counter to the neoliberal ideology of development It addresses both the monstrous misallocation of global resources wrought by the so called Washington Consensus and the suffering and destruction this has wreaked on third world peoples and economies Questioning potential pitfalls in the neoliberal policy package which the third world unlike Western Europe and Japan was largely forced to adopt has never been countenanced whether by international institutions or by mainstream crisis discourse One third world state after another discovered that international institutions were in effect hostile to their governments if they chose alternative developmental models or otherwise resisted the neoliberal triage of liberalization privatization and deregulation Nonetheless alternative options for countering or working within globalization for domestic advantage are widely sought by governments and progressives and increasingly so in light of the current global crisis These specially commissioned and peer reviewed chapters on key states such as Brazil China Cuba Egypt India Mexico Southeast Asia Indonesia Malaysia and Vietnam South Africa South Korea Syria Thailand and Venezuela shed light on both the failures of global neoliberalism and on the strategies some third world countries have developed to manage or resist it Contributors are experts in the fields of economics politics

Tony Smith, 2017-09-18 Progressive theorists and activists insist that contemporary capitalism is deeply flawed from a normative point of view. However, most accept the liberal egalitarian thesis that the serious shortcomings of market societies—financial excess, inequality, and so on—could be overcome with proper political regulation. Building on Marx's legacy, Tony Smith argues in *Beyond Liberal Egalitarianism* that advocates of this thesis—Rawls, Habermas, Stiglitz et al.—lack an adequate concept of capital and the state. These theorists also fail to comprehend new developments in world history ensuring that the destructive aspects of capitalism increasingly outweigh whatever creative elements it might continue to possess. Smith concludes that a normative social theory adequate to the twenty-first century must explicitly and unequivocally embrace socialism.

The Political Economy of Emerging Markets Richard Westra, 2017-03-16 Rapid and sustained growth in the twenty-first century global economy of large developing economies including Brazil, Russia, India, China, and South Africa has captivated policy makers and popular business press pundits alike. The coining of the new acronym BRICS and widespread adoption in international economics discourse of the designation emerging markets is symptomatic of that interest. *The Political Economy of Emerging Markets* situates the BRICS phenomena in the global economic context of advanced economies continuing to languish in recession and hovering over a deflationary abyss several years after the meltdown. A key question this volume seeks to answer is whether the BRICS and so-called emerging market phenomenon is really the new miracle it is presented as offering: new or modified varieties of reloaded capitalist development to the world, or yet another mirage. Written by ten leading global experts, this book answers the tough questions over BRICS and emerging markets, potentially realizing new varieties of reloaded capitalism. It is not only international and interdisciplinary but uniquely multiperspectival. Theories framing chapters are not of one genre but generate theoretical debate at the frontier of knowledge in political economy along with nuanced empirical analysis which flows from it. This book is of great importance to those who study political economy, development economics, and international political economy.
