Children in the Online World Elisabeth Staksrud, 2016-05-23 What is online risk How can we best protect children from it Who should be responsible for this protection Is all protection good Can Internet users trust the industry These and other fundamental questions are discussed in this book Beginning with the premise that the political and democratic processes in a society are affected by the way in which that society defines and perceives risks Children in the Online World offers insights into the contemporary regulation of online risk for children including teens examining the questions of whether such regulation is legitimate and whether it does in fact result in the sacrifice of certain fundamental human rights The book draws on representative studies with European children concerning their actual online risk experiences as well as an extensive review of regulatory rationales in the European Union to contend that the institutions of the western European welfare states charged with protecting children have changed fundamentally at the cost of the level of security that they provide In consequence children at once have more rights with regard to their personal decision making as digital consumers yet fewer democratic rights to participation and protection as digital citizens A theoretically informed yet empirically grounded study of the relationship between core democratic values and the duty to protect young people in the media sphere Children in the Online World will appeal to scholars and students across the social sciences with interests in new technologies risk and the sociology of childhood and youth Book The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license **Routledge**

International Handbook of Children's Rights Studies Wouter Vandenhoe, Ellen Desmet, Didier Reynaert, Sara Lembrechts, 2015-03-24 Since the adoption of the UN Convention on the Rights of the Child 1989 children's rights have assumed a central position in a wide variety of disciplines and policies This handbook offers an engaging overview of the contemporary research landscape for those people in the theory and practice of children's rights The volume offers a multidisciplinary approach to children's rights as well as key thematic issues in children's rights at the intersection of global and local concerns The main approaches and topics within the volume are Law social work and the sociology of childhood and anthropology Geography childhood studies gender studies and citizenship studies Participation education and health Juvenile justice and alternative care Violence against children and female genital mutilation Child labour working children and child poverty Migration indigenous children and resource exploitation The specially commissioned chapters have been written by renowned scholars and researchers and come together to provide a critical and invaluable guide to the challenges and dilemmas currently facing children's rights

Conditional Citizens Catherine Hartung, 2017-11-01 This book challenges readers to recognise the conditions that underpin popular approaches to children and young people's participation as well as the key processes and institutions that have enabled its rise as a global force of social change in new times The book draws on the vast international literature as well as interviews with key practitioners policy makers activists delegates and

academics from Japan South Africa Brazil Nicaragua Australia the United Kingdom Finland the United States and Italy to examine the emergence of the young citizen as a key global priority in the work of the UN NGOs government and academia In so doing the book engages contemporary and interdisciplinary debates around citizenship rights childhood and youth to examine the complex conditions through which children and young people are governed and invited to govern themselves The book argues that much of what is considered children and young people s participation today is part of a wider neoliberal project that emphasises an ideal young citizen who is responsible and rational while simultaneously downplaying the role of systemic inequality and potentially reinforcing rather than overcoming children and young people s subjugation Yet the book also moves beyond mere critique and offers suggestive ways to broaden our understanding of children and young people s participation by drawing on 15 international examples of empirical research from around the world including the Philippines Bangladesh the United Kingdom North America Finland South Africa Australia and Latin America These examples provoke practitioners policy makers and academics to think differently about children and young people and the possibilities for their participatory citizenship beyond that which serves the political agendas of dominant interest groups *Ethics, Ethnography and Education* Lisa Russell, Ruth Barley, Jonathan Tummons, 2022-06-23 Drawing on a diverse range of studies conducted in England Scotland South America India and the Basque Country this volume argues that administrative and conceptual change is needed to ensure that ethnographers commit fully to conscientiously managing ethics in situ **Understanding the Life Course** Lorraine Green, 2016-12-20 Understanding the Life Course provides a uniquely comprehensive guide to the entire life course from an interdisciplinary perspective Combining important insights from sociology and psychology the book presents the concepts theoretical underpinnings in an accessible style supported by real life examples From birth and becoming a parent to death and grieving for the loss of others Lorraine Green explores all stages of the life course through key research studies and theories in conjunction with issues of social inequality and critical examination of lay viewpoints She highlights the many ways the life course can be interpreted including themes of linearity and multidirectionality continuity and discontinuity and the interplay between nature and nurture The second edition updates key data and includes additional material on topics such as new technologies changing markers of transitions to adulthood active ageing resilience and neuropsychology This comprehensive approach will continue to be essential reading for students on vocational programmes such as social work and nursing and will provide thought provoking insight into the wider contexts of the life course for students of psychology and sociology **The Modern Child and the Flexible Labour Market** A. Kjørholt, J. Qvortrup, 2011-10-28 This book sheds light on new research related to welfare state child care policies and small children s everyday lives in institutions in Europe In uniting recent social childhood research welfare perspectives and historical and comparative approaches the book explores institutionalization as a feature of the modern child s life
