Convair Advanced Designs II Secret Fighters Attack Aircraft And Unique Concepts 1929 1973:

Advanced Designs II Robert E. Bradley, 2014-01-20 Although the Convair Aircraft Company built some of the world's best seaplanes and bombers during World War II the company's rise to prominence as a builder of fighters and attack aircraft did not occur until after 1945 This companion publication to Robert E Bradley's *Convair Advanced Designs Secret Projects* from San Diego 1923 1962 covers these new aircraft types in the same detailed and comprehensive style Previously unpublished company photographs models and drawings of such radical concepts as a vertical takeoff ground attack fighter and giant eight engine double decker military transport combine with other futuristic designs some of which eventually evolved into production aircraft With much new and comprehensive information and highly detailed technical specifications *Convair Advanced Designs II* is a natural follow up for owners of Bradley's first volume

American Aircraft Development of the Second World War William Norton, 2019-07-06 This book presents a little known aspect of America's aircraft development of World War II in emphasizing unique and non production aircraft or modifications for the purpose of research and experimentation in support of aircraft development advancing technology or meeting narrow combat needs It describes some important areas of American aviation weapons maturation under the pressure of war with emphasis on advanced technology and experimental aircraft configurations The great value of the work is illumination of little known or minimally documented projects that significantly advanced the science of aeronautics propulsion aircraft systems and ordnance but did not go into production Each chapter introduces another topic by examining the state of the art at the beginning of the war advantages pursued and results achieved during the conflict This last is the vehicle to examine the secret modifications or experiments that are little known Consequently this is an important single source for a fascinating and diverse collection of wartime efforts never before brought together under a single cover The war stories are those of military staffs engineering teams and test pilots struggling against short schedules and tight resource constraints to push the bounds of technology These epic and sometimes life threatening endeavors were as vital as actual combat operations

American Aircraft Development Second World War Legacy William J. Norton, 2021-12-02 This volume focuses on the influence of America's Second World War aviation development and experience subsequent aviation technological advances and world events in shaping American choices in military aircraft and associated weapons development during the few years following the war It shows how air warfare weapons from the last conflict were carried forward and altered how new systems evolved from these and how the choices fared in the next war Korea The period was one of remarkable progress in a short span of time via a great many aircraft and weapons programs and associated technological progress These systems were of immense importance influencing and growing the engineering production and operational capabilities to be exploited for the next generation of weapons that soon followed Emphasized is the innovative features or new technology and how these contributed to advancing American military aviation influencing the evolution of follow on models or types Included are military prototype

experimental and research aircraft that are equally important in understanding the history of American aircraft development. Combat employment progress and equipment adaptation during the Korean Conflict is then highlighted. Tabulated characteristics are provided of those aircraft that entered production or represented significant technological advances influencing others that follow.

Cold War Delta Prototypes Tony Buttler, 2020-12-24 The fascinating history of how the radical delta wing became the design of choice for early British and American high performance jets and of the role legendary aircraft like the Fairey Delta series played in its development. At the dawn of the supersonic jet age aircraft designers were forced to devise radical new planforms that suited the new power of the jet engine. One of the most successful was the delta wing. Although Gloster produced the delta wing Javelin and Boulton Paul its P 111 research aircraft, Fairey and Avro were the champions of the delta in Britain. Meanwhile in America with the exception of Douglas's Navy jet fighter programmes, Convair largely had the delta wing to itself. These development lines on each side of the Atlantic had essentially the same objective to produce high speed fighter aircraft. In Britain the Fairey Delta 2 went on to break the World Air Speed Record in spectacular fashion but it failed to win a production order. In contrast Convair received major orders for two jet fighter types and one jet bomber. At the same time the British Avro company built the 707 family of research aircraft which led to the famous Vulcan to show how the delta wing could be adopted for a highly successful subsonic bomber. This book examines the development of the delta wing in Britain and America and the way in which experimental aircraft like the Fairey Deltas proved their potential and versatility. In Britain it covers the Fairey Delta 1 and Fairey Delta 2, the proposed Fairey Delta Rocket Fighter and huge Delta 3 long range interceptor and the Avro 707. On the American side it examines the Convair XF 92 and XF 92A, the development of the Delta Dagger, Delta Dart family and the Convair Sea Dart, the world's only supersonic seaplane.
