Converters Dr. Hidaia Mahmood Alassouli, 2020-04-15 Creating E books in epub format is very important to sell E books in electronic book stores Most publishing and distribution E book stores will not accept the epub format document for E book if it includes any warnings or errors when validated and that is a very big challenge to all authors I devoted this book to evaluate some tools that can be used for creating validating and editing E books to be in proper Epub format without errors Personally I suggest the following guidelines for preparing E book in Epub format Write the document in Microsoft word as docx file Make sure to properly setup the h1 headings and h2 headings and h3 headings on each section of the document as these data are the most important data used by the Epub management software to convert the document to epub format Convert the Microsoft document to Epub format using Calibre E book management software Add all required metadata and the cover and also create a table of contents when converting the file Using any Epub reader check if the layout of epub document according to the headings you made on the word document is good and comfortable to any reader Validate the epub document to see if it has errors and warnings using the website <http://validator.idpf.org> Then try to troubleshoot and identify the exact location of the errors detected by the epub validator on the epub document by tracing the code view of the epub document using Sigil epub editor Then modify the word document to eliminate the errors And reconvert the word document to epub format using Calibre E book management software Validate the updated epub document for any errors again This book contains the following sections 1 Some online publishing and distribution stores 2 Epub Validators 3 Creation Epub file through online websites 4 Common software s to convert a file to Epub format 5 Converting document to Epub format using Calibre software 6 Editing Epub documents using Sigil Epub Editor *E-Book Formatting* Jeff Blum, 2021-10-10 The self publishing journey isn't always easy or cheap Some things like editing and cover design should be left to paid professionals but you can save money and achieve great results formatting your own e book DIY e book formatting may seem daunting but new tools paid and free make it fairly easy for most fiction manuscripts These tools are discussed early in this guide so you will have a short read if one of them works for you If your manuscript is more complicated e g a nonfiction book with tables list items images footnotes and other specially formatted elements this guide will explain everything you need to produce a professional and pleasing e book Advanced formatting is accomplished with HTML and CSS but you won't need any prior experience or knowledge of either of these as the guide includes a tutorial to teach you everything you need to know The end result of using this book will be a well formatted EPUB e book that can be submitted to Amazon Apple Kobo Nook and any other e book publishing platform NOTE if you are looking at other guides that mention needing a MOBI file for Amazon you are looking at an outdated guide as that is no longer best practice Here are some specific things that you will get from reading this book 1 A discussion of some useful tools including Atticus BBEdit BlueGriffon Calibre Draft2Digital Jutoh Kindle Create Kindle Previewer LibreOffice Writer Notepad Online HTML editors Reedsy Book Editor and Vellum 2 Pluses and minuses of using Microsoft Word 3 How to create a standard clickable table of
