Two Cultures of Policing John Leo, 2017-09-08 The emergence and functioning of two competing and sometimes conflicting cultures within police departments demonstrates how competition between street cops and bosses is at the heart of the organizational dilemma of modern urban policing Unlike other works in this field that focus on the monolithic culture or familial quality of policing this study demonstrates that which might look cohesive from the point of view of outsiders has its own internal dynamics and conflicts The book shows that police departments are not immune to the conflict inherent in any large scale bureaucracy when externally imposed management schemes for increasing efficiency and effectiveness are imposed on an existing social organization Based upon two years of extensive field work in which the author covered every major aspect of policing at the precinct level in the New York City police department from manning the complaint desk to riding in squad cars Ianni shows how the organized structure of the police department is disintegrating The new Management Cop Culture is bureaucratically juxtaposed to the precinct level Street Cop Culture and bosses' loyalties to the social and political networks of management cops rather than to the men on the street causes a sharp division with grave consequences for the departments The study concentrates on a series of dramatic events such as the suicide of a police officer charged with corruption a major riot and the trial of an officer accused of killing a prisoner while in police custody Ianni traces how these events affected relationships among fellow officers and between officers and bosses

The Psychology of Police Deadly Force Encounters Laurence Miller, 2020-02-11 The Psychology of Police Deadly Force Encounters Science Practice and Police is a fascinating look into the reality of police work The author integrates noted theories into a street wise understanding of being a police officer The focus of this book is on the use of deadly force by officers a topic of considerable importance The author discusses the psychosocial aspects of deadly force use stemming from the individual officer the situation organizational influences and the police culture Expanding further into social issues the controversial topic of race and use of deadly force is discussed This depiction looks at both sides that of racial victimization and that of the police which helps to provide a rather unique perspective on this important issue Of interest the author breaks down the different dimensions of cognition as a factor in decision making among police including the perception of the situation the action taken depending on that perception and the role of present and past memory This will make for a useful training topic to alert officers to the cognitive processes that go into deadly force use processes that they have the control to change to make a better decision Next the book delves into the biological factors that may be involved in police decision making again where deadly force is involved The various negative psychological impacts that a deadly force situation may bring about are identified and explained This book will be useful as a tool for both law enforcement practitioners and researchers to better understand the intricacies of deadly force by the police For researchers the book has

a multitude of references available for further exploration It will prove to be a useful guide and reference volume for police managers and supervisors mental health clinicians investigators attorneys judges law enforcement educators and trainers rank and file police officers including expert witnesses
