Massey states in the very beginning sentence of his book, *Categorically Unequal : The American Stratification System*, "All human societies have a social structure that divides people into categories based on a combination of achieved and ascribed traits" (Massey, 1). Though a plethora of these "categories" define each individual person, there are still certain traits, like race, gender, class, and sexuality, that oftentimes people use as a basis of discrimination. One thing that all these previously mentioned traits have in common, is that they are ascribed, rather than earned. "Ascribed social categories include nominal groupings such as gender, in which people are labeled male or female on the basis of inherited physical traits (ultimately, the possession of one versus two X chromosomes), as well as graduated categories such as age, in which people are classified according to the amount of time elapsed since birth" (Massey, 1). These ascribed traits, as Massey describes, are assigned unwillingly as they are characteristics one is born with. Based on these ascribed categories, categorical inequality could be defined as inherent favoritism toward individuals possessing specific ascribed characteristics deemed superior by members of society. With the social categories Massey writes of, there is also inherent stratification. Massey states, "Stratification refers to the unequal distribution of people across social categories that are characterized by differential access to scarce resources" (Massey, 1). There are many basic mechanics behind stratification, the first which Massey describes exploitation. "when people in one social group expropriate a resource produced by members of another social group and prevent them from realizing the full value of their effort in producing it" (Massey, 6). Secondly, there is opportunity hoarding. "Opportunity hoarding occurs when one social group restricts access to a scarce resource, either through outright denial or by exercising monopoly control that requires out-group members to pay rent in return for access" (Massey, 6). Massey then goes on to describe to social processes that institutionalize these mechanisms, "Emulation, whereby one group of people copies a set of social distinctions and interrelationships from another group or transfers the distinctions and interrelationships from one social setting to another" (Massey, 6-7) and "adaptation: social relations and day-to-day behaviors at the micro social level becomes oriented toward ranked categories, so that decisions about who to befriend, who to help, who to share with, who to live near, who to court, and who to marry are made in ways that assume the existence and importance of asymmetric social categories" (Massey 7) Social placement of groups can be perceived within two intersecting categories: warmth and competence. These are the categorical axis that make up the "Stereotype Content Model" (Massey, 11). The Stereotype Content Model consists of four groups or "quadrants" that are based on the amount of both warmth and competence given to individuals based on their ascribed characteristics. The top right quadrant, consisting of both high warmth and confidence, is that of the esteemed ingroup. "The top-right quadrant contains people within the person's own group, along with members of groups perceived to be similar to one's own. Naturally, we think of members of our own social group as warm and...

Categorically Unequal Douglas S. Massey, 2007-04-02 The United States holds the dubious distinction of having the most unequal income distribution of any advanced industrialized nation While other developed countries face similar challenges from globalization and technological change none rivals America's singularly poor record for equitably distributing the benefits and burdens of recent economic shifts In Categorically Unequal Douglas Massey weaves together history political economy and even neuropsychology to provide a comprehensive explanation of how America's culture and political system perpetuates inequalities between different segments of the population Categorically Unequal is striking both for its theoretical originality and for the breadth of topics it covers Massey argues that social inequalities arise from the universal human tendency to place others into social categories In America ethnic minorities women and the poor have consistently been the targets of stereotyping and as a result they have been exploited and discriminated against throughout the nation's history African Americans continue to face discrimination in markets for jobs housing and credit Meanwhile the militarization of the U S Mexican border has discouraged Mexican migrants from leaving the United States creating a pool of exploitable workers who lack the legal rights of citizens Massey also shows that women's advances in the labor market have been concentrated among the affluent and well educated while low skilled female workers have been relegated to occupations that offer few chances for earnings mobility At the same time as the wages of low income men have fallen more working class women are remaining unmarried and raising children on their own Even as minorities and women continue to face these obstacles the progressive legacy of the New Deal has come under frontal assault The government has passed anti union legislation made taxes more regressive allowed the real value of the federal minimum wage to decline and drastically cut social welfare spending As a result the income gap between the richest and poorest has dramatically widened since 1980 Massey attributes these anti poor policies in part to the increasing segregation of neighborhoods by income which has insulated the affluent from the social consequences of poverty and to the disenfranchisement of the poor as the population of immigrants prisoners and ex felons swells America's unrivaled disparities are not simply the inevitable result of globalization and technological change As Massey shows privileged groups have systematically exploited and excluded many of their fellow Americans By delving into the root causes of inequality in America Categorically Unequal provides a compelling argument for the creation of a more equitable society A Volume in the Russell Sage Foundation's Centennial Series

**Categorically Unequal** Massey, *Family Economics and Public Policy, 1800s-Present* Megan McDonald Way, 2018-08-29 This book explores family economic decision making in the United States from the nineteenth century through present day specifically looking at the relationship between family resource allocation decisions and government policy It examines how families have responded to incentives and constraints established by diverse federal and state policies and laws including the regulation of marriage and of female labor force participation child labor and education policies

including segregation social welfare programs and more The goal of this book is to present family economic decisions throughout US history in a way that contextualizes where the US economy and the families that drive it have been It goes on to discuss the role public policies have played in that journey where we need to go from here and how public policies can help us get there At a time when American families are more complex than ever before this volume will educate readers on the often unrecognized role that government policies have on our family lives and the uncelebrated role that family economic decision making has on the future of the US economy
