Development At The Wto International Economic Law:

The Future of International Economic Law William J. Davey, John Jackson, 2008-05-22 This book comprises fifteen specially commissioned contributions from the Editorial Board of the Oxford Journal of International Economic Law in celebration of the Journal's tenth anniversary. The contributions examine various issues confronting the international economic regime today and cover a wide range of international economic institutions such as the IMF, the World Bank and the WTO. It pays particular attention to examining the WTO and its regulatory scope, its systemic and structural deficiencies, its role in development and in liberalising trade in services, its tense relationship to regionalism and to trade-related issues such as environment, competition and dispute settlement in the field of investment. The contributions are authored by leading academics in the field, including lawyers, economists and political scientists who come from a range of developed and developing country backgrounds. This book constitutes a reflection by important individuals on almost all the major contemporary issues facing the WTO today and therefore represents a snapshot of the key lines of thinking among many of the leading legal scholars of the WTO and international economic regime which are likely to guide the field in the years to come. This is a book edition of the special 10th anniversary third issue of vol 10 of the Oxford Journal of International

Economic Law September 2007 **Law and Development Perspective on International Trade Law** Yong-Shik Lee, Gary Horlick, Won-Mog Choi, Tomer Broude, 2011-07-25 Economic development is the most important agenda in the international trading system today as demonstrated by the Doha Development Agenda (DDA) adopted in the current multilateral trade negotiations of the World Trade Organization (WTO) the Doha Round. This book provides a relevant discussion of major international trade law issues from the perspective of development in the following areas: general issues on international trade law and economic development and specific law and development issues in World Trade Organization Free Trade Agreement and regional initiatives. This book offers an unparalleled breadth of coverage on the topic and diversity of authorship as seventeen leading scholars contribute chapters from nine major developed and developing countries including the United States, Canada, Japan, China, including Hong Kong, South Korea, Australia, Singapore and Israel.

Development at the WTO Sonia E. Rolland, 2012-02-23 With the Doha Round on the rocks, the tension between the WTO's trade liberalization agenda and the development needs of many member states is more pronounced than ever. This book looks at the position of developing countries at the WTO from an institutionalist perspective and presents a range of proposals for change.

International Economic Law and Governance Julien Chaisse, Tsai-yu Lin, 2016-07-21 Nation states have long and successfully claimed to be the proper and sovereign forum for determining a country's international economic policies. Increasingly, however, supranational and non-governmental actors are moving to the front of the stage. New forms of multilateral and global policy making have emerged, including states and national administrations, key international organizations, international conferences, multinational enterprises and a wide range of transnational pressure groups and NGOs that all claim their share in exercising

power and influence on international and domestic policy making In honour of Professor Mitsuo Matsushita s intellectual contributions to the field of international economic law this volume reflects on the current state and the future of international economic law The book addresses a broad spectrum of themes in contemporary international economic regulations and focuses specifically on the significant areas of Professor Matsushita s scholarship including the rise of the soft law mechanism in international economic regulation the role of the WTO and dispute settlement and specific areas such as competition subsidies anti dumping intellectual property and natural resources Part one of the volume provides a comprehensive and critical analysis of the rule based international dispute settlement mechanisms Part two investigates the normative influences to and from WTO law and Part three focuses on policy and law making issues *Emerging Powers, Global Justice and International Economic Law* Andreas Buser,2021-01-04 The book assesses emerging powers influence on international economic law and analyses whether their rhetoric of reforming this unjust order translates into concrete reforms The questions at the heart of the book surround the extent to which Brazil Russia India China and South Africa individually and as a bloc BRICS provide alternative regulatory ideas to those of Western States and whether they are able to convert their increased power into influence on global regulation To do so the book investigates two broader case studies namely the reform of international investment agreements and WTO reform negotiations since the start of the Doha Development Round As a general outcome it finds that emerging powers do not radically challenge established law Third World rhetoric mostly does not translate into practice and rather serves to veil economic interests Still emerging powers provide for some alternative regulatory ideas already leading to a diversification of international economic law As a general rule they tend to support norms that allow host States much policy space which could be used to protect and fulfil socio economic human rights especially but not only in the Global South *WTO - World Economic Order, World Trade Law* Peter-Tobias Stoll, Frank Schorkopf,2006-03-01 Since its foundation in 1995 the World Trade Organization with its extensive legal provisions has been defining the world trade relations and also had an enormous impact on both European and national economic law At the same time the WTO is perceived within the political discussion as a symbol for the world trade relations as a whole the challenges of globalization and justice of the world trade order Due to the expansion consolidation and the increased enforcement of its rules the relevance of the World Trade Organization will continue to increase This book describes the institutional system the basic principles and the vast variety of rules of the World Trade Organization It aims at clarifying the structures and the general concepts in order to enable the reader to get a better understanding of the issues at stake in many of the discussions and controversies on world trade *Research Handbook on Global Justice and International Economic Law* John Linarelli,2013-09-30 The fairness of institutions of global economic governance ranks among the most pressing issues of our time **Cultural Heritage in International Economic Law** Valentina Vadi,2023-03-27 Can cultural heritage be adequately protected vis vis economic globalization This book investigates whether

and how international economic law governs cultural phenomena by mapping the relevant legal framework discussing the relevant disputes concerning cultural elements adjudicated before international economic courts namely the World Trade Organization adjudicative bodies and investment treaty arbitral tribunals and proposing legal methods to reconcile cultural and economic interests It thus provides a comprehensive evaluation of possible solutions including evolution of the law through treaty interpretation and reforms to improve the balance between economic governance and cultural policy objectives

WTO Dispute Settlement Understanding and Development Mervyn Martin, 2013-01-29 This book examines the effectiveness of the WTO DSU in pursuing the developmental objectives of the WTO Unregulated globalisation enabled developed countries to benefit more from the process International trade theories emphasise on welfare enhancement and influenced the development of international trade cooperation However its development during the colonial era emphasised on protection of colonial interests The WTO was meant to emphasise on a strengthened dispute settlement mechanism to support its diverse membership It has failed to achieve this due to weak mechanisms for promoting developing country participation The DSU review based on the draft negotiating proposal from the DSB reflects the on going weakness of the DSU in pursuing developed country interests whilst ignoring major problems faced by developing countries in using the DSU Five major issues in relation to the DSU are identified in this investigation However the Chairman's text in no way addresses any of these

Research Handbook in International Economic Law Andrew T. Guzman, A. O. Sykes, 2008-01-01 This major new work consists of carefully commissioned original and incisive contributions from leading scholars in the field of international economic law Covering a full range of topics the Handbook provides an accessible treatment of the law in each area as well as a thoughtful synthesis and discussion of related public policy issues from a broadly social science perspective
