The Plunder of Black America Calvin Schermerhorn, 2025-02-11 The long history of the racial wealth gap in America told through the stories of seven Black families who struggled to build wealth over multiple generations Wealth is central to the American pursuit of happiness and is an overriding measure of well being Yet wealth is conspicuously absent from African American households Why do some 3 5 million Black American families have zero or negative wealth Historian Calvin Schermerhorn traces four hundred years of Black dispossession and decapitalization what Frederick Douglass called plunder through the stories of families who have strived to earn and keep the fruits of their toils Their struggles reveal that the ever evolving strategies to strip Black income and wealth have been critical to sustaining a structure of racialized disadvantage These accounts also tell of the quiet heroism of those who worked to overcome obstacles and defy the plunder From the story of Anthony and Mary Johnson abducted from Angola and brought to Virginia in 1619 to the enslaved Black workers dispossessed by the Custis Washington family to Venture Smith born Brotheer Furro who purchased his freedom to three generations of a family enslaved in the South who moved north after Emancipation to the Tulsa massacre and the subprime lending crisis Schermerhorn shows that we cannot reckon with today s racial wealth inequality without understanding its unrelenting role in American history

the pivotal Southern city of Charleston South Carolina historic seaport center for the slave trade It draws upon census data manuscript collections and newspaper accounts to expand our knowledge of this particular community of nineteenth century black urbanites Although the federal government codified the rights of African Americans into law following the Civil War it was the initiatives taken by black men and women that actually transformed the theoretical benefits of emancipation into clear achievement Because of its large free black population Charleston provided a case study of black social class stratification and social mobility even before the war Reconstruction only emphasized that stratification and Powers examines in detail the aspirations and concessions that shaped the lives of the newly freed blacks who were led by a black upper class that sometimes seemed more inclined to emulate white social mores than act as a vanguard for fundamental social change Unlike most Reconstruction studies which concentrate on politics Black Charlestonians explores the era's vital socioeconomic challenges for blacks as they emerged into full citizenship in an important city in the South Choice's 1996 Outstanding Academic Books List
