Low-Cost Aviation Wei Qiang Lin, Jean-Baptiste Fretigny, 2022-06-15. *Low Cost Aviation: Aeromobilities, Culture, Politics, and Infrastructures* covers critical societal issues such as labor regimes, unequal and changing flying publics, transnational dynamics of migration, tourism, business experiences, environmental challenges, and shifting territorialities of LCCs at various scales. It bridges transport and mobility studies, fostering transport sustainability and mobility justice to improve air transport management. Offers empirically grounded insights on key social issues and their implications. Draws on the expertise of an international team of scholars across the social sciences, including geography, urban studies, history, and economics.
