Texts and Materials is a solid application oriented text for students taking law subjects Many new features make this edition a richer and stronger learning resource for students Several factors motivated the authors to write this book After having the experience in legal field and teaching for more than 10 years it became clear that there was a definite need for more detail materials in this area In addition there was need for a book which would give full recognition to an easier method and the authors felt it was time for a text which would develop the ideas and methods with this in mind This book covers a thorough discussion on ow to study the law in a very effective and easy method A major audience for the book will be students studying the law subjects The order of topics however provides a degree of flexibility so that the book can be of interest to different readers through basic concepts until the advanced concepts i e the discussion of the cases The purpose of this book is to take the readers on an introduction to study the law by which the meaning of such subject at basic level is better understood Hopefully this book can be benefited by the readers in their journey to success **Understanding Gender-Based Violence**

Caroline Bradbury-Jones,Louise Isham,2021-02-17 This edited book brings together the voices and insights of survivors practitioners educators and researchers working to prevent and minimise the harms of gender based violence with a specific focus on equipping health professionals and social workers to support victim survivors Practitioners can and often do play a critical role supporting victim survivors of gender based violence however this work has historically been carried out by those in specialist roles and there remains gaps and inconsistencies in education and training for qualifying and post qualified professionals This book makes a valuable contribution to addressing these gaps It provides practitioners with a comprehensive resource on contemporary debates and research in the field of gender based violence To support readers learning each chapter contains reflective exercises and draws clear links between research theory and practice The book is structured into four sections The first section considers the rise of gender based violence in policy and practice and questions to what extent this once marginalised perspective has become embedded in health and social work training and education The second section of the book explores some of the expressions contexts and implications of gender based violence Each chapter considers the role of health care professionals and social workers and invites the reader to reflect on their potential role in these areas The third section of the collection focuses on one of the most common forms of gender based violence that

health and social work professionals are likely to encounter physical psychological sexual and financial violence by an intimate partner who may also be a parent Finally the fourth section showcases innovative responses to supporting victim survivors and challenging systems that contribute to gender inequality The intention of this book is to equip health care professionals and social workers with critical practical and ethical resources to help them work with victim survivors and where possible engage in transformative efforts to end the harms of gendered inequalities and violence **Legal Aspects**

Kaganas, 2012-02-07 The third edition of this work on family law comprising text cases and materials provides not only an explication of legal principle but also explores primarily from a feminist perspective some of the assumptions about and constructions of gender sexual orientation class and culture that underlie the law It examines the ideology of the family and in particular the role of the law in contributing to and reproducing that ideology Structured around the themes of equality welfare and family privacy the book aims to offer the benefits of a textbook while also giving students a wide ranging set of materials for classroom discussion As well as providing a firm grounding in family law the text sets the law in its social and historical context and encourages a critical approach by students to the subject It provides an ideal introduction to family law for undergraduates but will be equally helpful for postgraduate students of family law for whom it provides a challenging selection of materials set within a theoretical framework rich in ideas and arguments Review of the second edition Diduck and Kaganas examine legal developments to shed light on society principally by investigating the ways in which family law constructs and regulates family life and responsibilities There is an important and ambitious book that aims ultimately at a feminist restatement of family law The book is written and referenced in such depth that it is a useful resource for legal as well as social science researchers at all levels whether looking for theoretical inspiration or drawing up a literature review The range of diverse sources that Diduck and Kaganas draw on is impressive they seem to have included every bit of material that helps feminists make sense of family law There is a well pitched selection of further reading of such material at the end of each chapter What's more they undersell themselves by describing their book as Text Cases and Materials because they have woven by far the largest proportion of the cases and materials into the text Helen Reece Times Higher Education May 2007 Reviews of first edition A stimulating work which attempts to situate family law in its social historical and political context Its appeal should not be confined to family law students as its commitment to a critical and analytical approach offers

insights and ideas with broader significance Mary Childs Child and Family Law Quarterly September 2002 The arguments are provocative the analysis is stimulating and the materials amassed strongly support the authors aim to question the axiomatic status of what is traditionally designated as the family Fiona E Raitt Infant and Child Development September 2002 It is not often that one can say of a textbook in Law that it makes interesting reading with quite the enthusiasm that can be expressed for this text This new publication offers something that few textbooks seem to offer a book you CAN open up virtually anywhere and find an interesting piece on almost any aspect of the broad family law spectrum Penny Booth The Law Teacher September 2002 All the major themes in feminist and constructionist perspectives in family law are presented together with a wealth of readings and extensive references As a teaching manual it is excellent a coherent feminist perspective across the entire range of family law Marty Slaughter Feminist Legal Studies July 2003

The Criminalization of Incitement to Terrorism from an International Perspective Ye Tao, 2023-07-25 This book critically analyzes the criminalization of incitement to terrorism under the fundamental principles of legality necessity and proportionality with the aim of striking a fair balance between security and liberty on this complicated issue The criminalization of incitement to terrorism has gained momentum but no exact or generally accepted definition of this offense exists at the international level What s more given that the criminalization of incitement to terrorism results in restrictions on the exercise of citizens freedom of expression there should be certain limitations on those criminal measures to avoid unnecessary or disproportionate infringement of this fundamental human right Nevertheless there has not been a precise standard by which to determine how to draw the line between anti terrorism and the protection of freedom of expression Hence it could be concluded that the criminalization of incitement to terrorism concerns how to balance security and liberty and the safeguarding principles of legality necessity and proportionality should be fully observed in considering this issue This book studies definitions of incitement terrorism and incitement to terrorism under the relevant international and national legislation and points out the existing absence ambiguousness or substantive divergence in defining actus reus and mens rea regarding incitement to terrorism It carefully considers the current need for and essential limitations on criminal measures against incitement to terrorism in accordance with the principles of necessity and proportionality and particularly focuses on how to balance the protection of freedom of expression with the criminalization of incitement to terrorism In considering how to draw a line between the two the book formulates precise requirements for objective and subjective elements of this offense in accordance with the principle of legality Given its scope it will be of interest not only to academics human rights lawyers and practitioners but also to policymakers as it offers an extensive evaluation of the effects and counter effects of existing criminal measures
