Death And Denial Interdisciplinary Perspectives On The Legacy Of Ernest Becker:

Death and Denial Daniel Liechty, 2002-12-30 The theory of Generative Death Anxiety GDA suggests that at the deepest level human behavior is motivated by the unavoidable need to shield oneself from consciousness of human mortality Recognition that fear of death and its consequences necessarily colors the affairs of humans clearly runs through the history of religion and philosophy from the most ancient sources to the present GDA theory is a developing body of research and writing that stands in this line of human thinking about death giving prominent focus especially to pervasive human mortality anxiety in the range of its symbolic expressions and the behavioral consequences of this anxiety The Ernest Becker

Reader Daniel Liechty, 2017-09-01 Ernest Becker 1924 1974 was an astute observer of society and human behavior during America's turbulent 1960s and 1970s Trained in social anthropology and driven by a transcending curiosity about human motivations Becker doggedly pursued his basic research question What makes people act the way they do Dissatisfied with what he saw as narrowly fragmented methods in the contemporary social sciences and impelled by a belief that humankind more than ever needed a disciplined rational and empirically based understanding of itself Becker slowly created a powerful interdisciplinary vision of the human sciences one in which each discipline is rooted in a basic truth concerning the human condition That truth became an integral part of Becker's emerging social science Almost inadvertently he outlined a perspective on human motivations that is perhaps the most broadly interdisciplinary to date His perspective traverses not only the biological psychological and social sciences but also the humanities and educational political and religious studies Ernest Becker is best known for the books written in the last few years before his death from cancer including the highly praised Pulitzer Prize winning volume *The Denial of Death* 1974 and *Escape from Evil* 1975 These late works however were built on a distinguished body of earlier books essays and reviews The power and strength of Becker's ideas are fully present in his early works which underlie his later contributions and give direction for interpreting the development of his ideas Although Ernest Becker's life and career were cut short his major writings have remained continually in print and have captured the interest of subsequent generations of readers *The Ernest Becker Reader* makes available for the first time in one volume much of Becker's early work and thus places his later work in proper context It is a major contribution to the ongoing interest in Becker's ideas Interdisciplinary Perspectives on Mortality and its Timings Shane

McCorristine, 2017-09-19 This book is open access under a CC BY 4.0 license This volume provides a series of illuminating perspectives on the timings of death through in depth studies of Shakespearean tragedy criminal execution embalming practices fears of premature burial rumours of Adolf Hitler's survival and the legal concept of brain death In doing so it explores a number of questions including how do we know if someone is dead or not What do people experience at the moment when they die Is death simply a biological event that comes about in temporal stages of decomposition or is it a social event defined through cultures practices and commemorations In other words when exactly is death Taken together

The Psychology of Death in Fantasy and History Jerry Piven,2004-03-30 This volume investigates the impact of death consideration on such phenomena as Buddhist cosmology the poetry of Rilke cults and apocalyptic dreams Japanese mythology creativity and even psychotherapy Death is seen as a critical motivation for the genesis of artistic creations and monuments of belief systems fantasies delusions and numerous pathological syndromes Culture itself may be understood as the innumerable ways that societies defend themselves against helplessness and annihilation how they mould and recreate the world in accordance with their wishes and anxieties the social mechanisms employed to deny annihilation and death Whether one speaks of the construction of massive burial tombs magical transformations of death into eternal life afterlives or resurrections the need to cope with death and deny its terror and effect are the sine qua non of religion culture ideology and belief systems in general
