Decolonization Perspectives From Now And Then Rewriting Histories:

Decolonization Prasenjit Duara, 2004 Decolonization brings together the most cutting edge thinking by major historians of decolonization including previously unpublished essays and writings by leaders of decolonizing countries including Ho Chi Minh and Jawaharlal Nehru The chapters in this volume present a move away from Western analysis of decolonization and instead move towards the angle of vision of the former colonies This is a ground breaking study of a subject central to recent global history

DECOLONIZATION Prasenjit Duara, 2004 *Decolonization* Prasenjit Duara, 2004-02-24 Brings together the most cutting edge thinking by major historians of decolonization to create a groundbreaking study of a subject central to recent global history

Peace, Decolonization, and the Practice of Solidarity Rob Skinner, 2023-10-05 This book shows that the connected histories of decolonization and globalization concern the practices of individuals and movements as much as they do the ideologies of states institutions and organizations Viewing decolonization through non state activist practices and setting anti colonial solidarity in the context of the methods of contemporary global peace movements it argues that seemingly marginal histories can illuminate aspects of the end of empire that are not readily apparent in studies centred on state diplomacy and nationalist movements Focusing on a group of British and American activists including the pacifist campaigner A J Muste the anti apartheid priest Michael Scott and the civil rights organiser Bayard Rustin Skinner explores connected global histories of anti nuclear peace campaigns anti colonialism and decolonization to illuminate new perspectives on the end of empire and the Cold War Studying a failed attempt to infiltrate the French atom bomb test site in southern Algeria and a mass march across the border between Tanganyika and Northern Rhodesia that never took place these stories provide valuable insights into the interactions between local and global scales of historical experience In presenting these histories this book demonstrates how global and transnational histories can challenge and disrupt rather than reinforce hierarchies of power and privileges In doing so it also contributes to ongoing debates surrounding the nature of decolonization as a historical phenomenon by focusing on the practices of activism that shaped and were shaped by the political and intellectual structures of decolonization

Global Perspectives on Global History Dominic Sachsenmaier, 2011-08-04 In recent years historians across the world have become increasingly interested in transnational and global approaches to the past However the debates surrounding this new border crossing movement have remained limited in scope as theoretical exchanges on the tasks responsibilities and potentials of global history have been largely confined to national or regional academic communities In this groundbreaking book Dominic Sachsenmaier sets out to redress this imbalance by offering a series of new perspectives on the global and local flows sociologies of knowledge and hierarchies that are an intrinsic part of historical practice Taking the United States Germany and China as his main case studies he reflects upon the character of different approaches to global history as well as their social political and cultural contexts He argues that this new global trend in historiography needs to be supported by a corresponding increase in

transnational dialogue cooperation and exchange The Oxford Illustrated History of the World Felipe Fernández-Armesto, 2019-01-03 Imagine the planet as if from an immense distance of time and space as a galactic observer might see it with the kind of objectivity that we who are enmeshed in our history can't attain The Oxford Illustrated History of the World encompasses the whole span of human history It brings together some of the world's leading historians under the expert guidance of Felipe Fernandez Armesto to tell the 200 000 year story of our world from the emergence of homo sapiens through to the twenty first century the environmental convulsions the interplay of ideas good and bad the cultural phases and exchanges the collisions and collaborations in politics the successions of states and empires the unlocking of energy the evolutions of economies the contacts conflicts and contagions that have all contributed to making the world we now inhabit *The Oxford History of the World* Felipe Fernández-Armesto, 2023 The Oxford History of the World is the story of humanity itself from earliest times to the present day and the changes good and bad which have shaped our world

Inter-imperiality Laura Doyle, 2020-11-02 In Inter imperialism Laura Doyle theorizes the co emergence of empires institutions language regimes stratified economies and literary cultures over the longue dur e Weaving together feminist decolonial and dialectical theory she shows how inter imperial competition has generated a systemic stratification of gendered racialized labor while literary and other arts have helped both to constitute and to challenge this world order To study literature is therefore Doyle argues to attend to world historical processes of imaginative and material co formation as they have unfolded through successive eras of vying empires It is also to understand oral performed and written literatures as power transforming resources for the present and future To make this case Doyle analyzes imperial economic processes across centuries and continents in tandem with inter imperially entangled literatures from A Thousand and One Nights to recent Caribbean fiction Her trenchant interdisciplinary method reveals the structural centrality of imaginative literature in the politics and possibilities of earthly life **Race, Place, Trace** Lorenzo Veracini, Susan Slyomovics, 2022-02-01

Continuing Patrick Wolfe's work on settler colonialism This edited collection celebrates Patrick Wolfe's contribution to the study and critique of settler colonialism as a distinct mode of domination The chapters collected here focus on the settler colonial assimilation of land and people and on what Wolfe insightfully defined as preaccumulation the ability of settlers to mobilise technologies and resources unavailable to resisting Indigenous communities Wolfe's militant and interdisciplinary scholarship is thus emphasised together with his determination to acknowledge Indigenous perspectives and the efficacy of Indigenous resistances In case studies of Australia French Algeria and the United States contributors illustrate how seminal his contribution was and is There are three core reasons why it is especially important to develop the field of thinking inaugurated by Wolfe first because the demand for Indigenous sovereignty has been crucial to recent struggles against neoliberal attacks in the settler societies second because a critique of settler colonialism and its logic of elimination has supported important struggles against environmental devastation and third because the ability to think race in ways that are

not disconnected from other struggles is now more needed than ever Racial capitalism and settler colonialism are as imbricated now as they always have been and keeping both in mind at the same time highlights the need to establish and nurture solidarities that reach across established divides

The Interrogation Rooms of the Korean War Monica Kim, 2020-11-03 Traditional histories of the Korean War have long focused on violations of the thirty eighth parallel the line drawn by American and Soviet officials in 1945 dividing the Korean peninsula But *The interrogation rooms of the Korean War* presents an entirely new narrative shifting the perspective from the boundaries of the battlefield to inside the interrogation room Upending conventional notions of what we think of as geographies of military conflict Monica Kim demonstrates how the Korean War evolved from a fight over territory to one over human interiority and the individual human subject forging the template for the U S wars of intervention that would predominate during the latter half of the twentieth century and beyond Kim looks at how during the armistice negotiations the United States and their allies proposed a new kind of interrogation room one in which POWs could exercise their free will and choose which country they would go to after the ceasefire The global controversy that erupted exposed how interrogation rooms had become a flashpoint for the struggles between the ambitions of empire and the demands for decolonization as the aim of interrogation was to produce subjects who attested to a nation s right to govern The complex web of interrogators and prisoners Japanese American interrogators Indian military personnel Korean POWs and interrogators and American POWs that Kim uncovers contradicts the simple story in U S popular memory of brainwashing during the Korean War
