Space, Image, and Reform in Early Modern Art Arthur J. DiFuria, Ian Verstegen, 2021-11-08 The essays in *Space Image and Reform in Early Modern Art* build on Marcia Hall's seminal contributions in several categories crucial for Renaissance studies especially the spatiality of the church interior the altarpiece's facture and affectivity the notion of artistic style and the controversy over images in the era of Counter Reform Accruing the advantage of critical engagement with a single paradigm this volume better assesses its applicability and range The book works cumulatively to provide blocks of theoretical and empirical research on issues spanning the function and role of images in their contexts over two centuries Relating Hall's investigations of Renaissance art to new fields *Space Image and Reform* expands the ideas at the center of her work further back in time further afield and deeper into familiar topics thus achieving a cohesion not usually seen in edited volumes honoring a single scholar

Principles of Art History Writing David Carrier, 1991 *Principles of Art History Writing* traces the changes in the way in which writers about art represent the same works These differ in such deep ways as to raise the question of whether those at the beginning of the process even saw the same things as those at the end did Carrier uses four case studies to identify and explain changing styles of restoration and the history of interpretation of selected works by Piero Caravaggio and van Eyck Back cover

The Ashgate Research Companion to Dutch Art of the Seventeenth Century Wayne Franits, 2017-07-05 Despite the tremendous number of studies produced annually in the field of Dutch art over the last 30 years or so and the strong contemporary market for works by Dutch masters of the period as well as the public's ongoing fascination with some of its most beloved painters until now there has been no comprehensive study assessing the state of research in the field As the first study of its kind this book is a useful resource for scholars and advanced students of seventeenth century Dutch art and also serves as a springboard for further research Its 19 chapters divided into three sections and written by a team of internationally renowned art historians address a wide variety of topics ranging from those that might be considered traditional to others that have only drawn scholarly attention comparatively recently

Nature and Imagination in Ancient and Early Modern Roman Art Gabriel Pihás, 2022-07-27 This volume uses the art of Rome to help us understand the radical historical

break between the fundamental ancient pre supposition that there is a natural world or cosmos situating human life and the equally fundamental modern emphasis on human imagination and its creative power Rome s unique art history reveals a different side of the battle between ancients and moderns than that usually raised as an issue in the history of science and philosophy The book traces the idea of a cosmos in pre modern art in Rome from the reception of Greek art in the Roman republic to the construction of the Pantheon to early Christian art and architecture It then sketches the disappearance of the presupposition of a cosmos in the High Renaissance and Baroque periods as creativity became a new ideal Through discussions of the art and architecture that defines proto modern Rome from Michelangelo s *terribilita* in the Sistine Chapel Caravaggio s realism Baroque illusionism the infinities of Borromini s architecture to the Grand Tour s representations of ruins through an interpretation of such major issues and works this book shows how modern art liberates us while leaving us feeling estranged from our grounding in the natural world The book will be of interest to scholars working in art history architectural history classics philosophy and early modern history and culture

Most, 2007-09-30 About the disciple known as Doubting Thomas everyone knows at least this much he stuck his finger into the risen Jesus wounds Or did he A fresh look at the Gospel of John reveals how little we may really understand about this most perplexing of biblical figures and how much we might learn from the strange twists and turns Thomas s story has taken over time From the New Testament Glenn W Most traces Thomas s permutations through the centuries as Gnostic saint missionary to India paragon of Christian orthodoxy hero of skepticism and negative example of doubt blasphemy stupidity and violence Rife with paradoxes and tensions these creative transformations at the hands of storytellers theologians and artists tell us a great deal

about the complex relations between texts and their interpretations and about faith love personal identity the body and twins among other matters Doubting Thomas begins with a close reading of chapter 20 of the Gospel of John set against the conclusions of the other Gospels and ends with a detailed analysis of the painting of this subject by Caravaggio setting it within the pictorial traditions of late antiquity the Middle Ages and the Renaissance Along the way Most considers narrative reactions to John s account by storytellers of various religious persuasions and Christian theologians interpretations of John 20 from the second century ad until the Counter Reformation His work shows how Thomas s story in its many guises touches upon central questions of religion philosophy hermeneutics and not least life

Representing from Life in Seventeenth-century Italy Sheila McTighe, 2025-10-01 In drawing or painting from live models and real landscapes more was at stake for artists in early modern Italy than achieving greater naturalism To work with the model in front of your eyes and to retain their identity in the finished work of art had an impact on concepts of artistry and authorship the authority of the image as a source of knowledge the boundaries between repetition and invention and even the relation of images to words This book focuses on artists who worked in Italy both native Italians and migrants from northern Europe The practice of depicting from life became a self conscious departure from the norms of Italian arts In the context of court culture in Rome and Florence works by artists ranging from Caravaggio to Claude Lorrain Pieter van Laer to Jacques Callot reveal new aspects of their artistic practice and its critical implications
