

The operation of a mechanized piece of equipment such as the CASE 230 baler requires thorough knowledge of its working parts, operational capabilities and capacities. Failure to develop this familiarity may result in serious injury to the operator or machine, plus drastic loss of efficiency due to improper setting, crop losses and repair down-time out of the field.

TRACTOR-BALER HOOKUP

The baler is equipped with a fully adjustable swing type drawbar that provides quick and easy tractor attachment with either PTO or engine drive.

Information on drawbar adjustments, operation and safety is given in the following text. These points are VERY IMPORTANT and should be followed closely.

IMPORTANT

When attaching tongue to frame of baler, it is important to remember to place the head of the attaching bolt on the top and not underneath the frame.

Frame Leveling

The baler frame must be parallel to the ground on both the PTO and engine driven machines. To obtain the proper dimensions between the ends of the tractor and baler PTO shafts refer to Figure 15. The hitch clevis can be adjusted up or down to meet the desired height. Also, washers can be added above or below the tractor drawbar for additional height adjustment.

Turning

Refrain from making extremely sharp LEFT TURNS with a baler with PTO drive. The PTO shield could be damaged when the drawbar is in transport position. This can cause damage to the baler and also to the tractor or operator.

Horizontal Adjustment

This adjustment of the drawbar allows the over-all width of the baler to be narrowed to less than eight feet with the drawbar in transport position. (See Figures 15 and 17 for transport position adjustment.) This allows operator with excellent maneuverability through narrow gates, doors, lanes and bridges.

DISENGAGE

THAT

Tracking

If the right hand tractor wheel runs on the windrow, move the tractor wheel in to obtain clearance. DO NOT SWING THE DRAWBAR.

Safety Regulations

Some states require a safety chain in addition to the regular hitch equipment when transporting a machine on the highway. Always comply with local or state laws concerning Safety Chain Requirements. For night travel install the warning lamp attachment. See page 49.
