Aalbers, 2024-07-19 This book examines the progression of real estate development within the deindustrialization financialization nexus It explores the roles it has in semi peripheral contexts such as Romania where it overlaps with the process of the transformation of state socialism into neoliberal capitalism viewed at the intersection of global national and local forces The book focuses on real estate development in Romania as a product and a driver of

capitalism It contributes to ongoing debates in critical urban theories and Marxist perspectives in urban sociology Focusing on the under researched East European region it decenters social research and fine tunes the political economy theory about state and economic restructuring The book contains methodological and theoretical insights that are useful in other contexts beyond Romania and Central and Eastern Europe especially in other semi peripheral emerging markets The focus of critical inquiry into capitalist transformations adopted in this book can also support political activism It uncovers the varieties of the deindustrialization financialization nexus in real estate built on the dismantled pre 1990 socialist industrial plants The chapters describe the advancement of real estate investments across second and third tier cities displaying uneven development and subordinate financialization at the intersection of local and global processes and political and economic actors It will be of interest to researchers and students of urban sociology economic sociology political economy human geography and political geography Chapter 3 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Politics in Captivity Lena Zuckerwise, 2024-07-02 From the 1811 German Coast Slave Rebellion to the 1971 Attica Prison Uprising from the truancy of enslaved women to the extreme self discipline exercised by prisoners in solitary confinement Black Americans have through time resisted racial regimes in extraordinary and everyday ways Though these acts of large and small scale resistance to slavery and incarceration are radical and transformative they have often gone unnoticed This book is about Black rebellion in captivity and the ways that many of the conventional well worn constructs of academic political theory render its political dimensions obscure and indiscernible While Hannah Arendt is an unlikely theorist to figure prominently in any discussion of Black politics her concepts of world and worldlessness offer an indispensable framework for articulating a theory of resistance to chattel and carceral captivity *Politics in Captivity* begins by taking seriously the ways in which slavery and incarceration share important commonalities including historical continuity In Zuckerwise's account of this commonality the point of connection between enslaved and incarcerated people is not exploited labor but rather resistance The relations between the rebellions of both groups appear in the writings of Muhammed Ahmad Angela Davis George Jackson Ruchell Magee and Assata Shakur a genre Zuckerwise calls Black carceral political thought The insights of these thinkers and activists figure into Zuckerwise's analyses of largescale uprisings and quotidian practices of resistance which she conceives as acts of world building against conditions of forced worldlessness In a moment when a collective racial reckoning is underway when Critical Race Theory is a target of the Right when prison abolition has become more prominent in mainstream political discourse it is now more important than ever to look to historical and contemporary practices of resistance to white domination

A Cultural History of Early Modern

English Cryptography Manuals Katherine Ellison,2016-06-10 While there are many surveys of cryptography none pay any attention to the volume of manuals that appeared during the seventeenth century or provide any cultural context for the appearance design or significance of the genre during the period Through close readings of five specific primary texts that have been ignored not only in cryptography scholarship but also in early modern literary scientific and historical studies this book allows us to see one origin of disciplinary division in the popular imagination and in the university when particular broad fields the sciences the mechanical arts and the liberal arts came to be viewed as more or less profitable **Advances in VLSI, Communication, and Signal Processing** David Harvey, Haranath Kar, Shekhar Verma, Vijaya

Bhadauria,2020-10-14 This book comprises select peer reviewed papers from the International Conference on VLSI Communication and Signal processing VCAS 2019 held at Motilal Nehru National Institute of Technology MNNIT Allahabad Prayagraj India The contents focus on latest research in different domains of electronics and communication engineering in particular microelectronics and VLSI design communication systems and networks and signal and image processing The book also discusses the emerging applications of novel tools and techniques in image video and multimedia signal processing This book will be useful to students researchers and professionals working in the electronics and communication domain
