Data Manipulation With R Use R:

Data manipulation with R : efficiently perform data manipulation using the split-apply-combine strategy in R Jaynal Abedin, Kishor Kumar Das, 2015-03-31 This book is for all those who wish to learn about data manipulation from scratch and excel at aggregating data effectively It is expected that you have basic knowledge of R and have previously done some basic administration work with R Data Manipulation with R Jaynal Abedin, 2014 This book is a step by step example oriented tutorial that will show both intermediate and advanced users how data manipulation is facilitated smoothly using R This book is aimed at intermediate to advanced level users of R who want to perform data manipulation with R and those who want to clean and aggregate data effectively Readers are expected to have at least an introductory knowledge of R and some basic administration work in R such as installing packages and calling them when required Data Manipulation with R Phil Spector, 2008-03-19 This book presents a wide array of methods applicable for reading data into R and efficiently manipulating that data In addition to the built in functions a number of readily available packages from CRAN the Comprehensive R Archive Network are also covered All of the methods presented take advantage of the core features of R vectorization efficient use of subscripting and the proper use of the varied functions in R that are provided for common data management tasks Most experienced R users discover that especially when working with large data sets it may be helpful to use other programs notably databases in conjunction with R Accordingly the use of databases in R is covered in detail along with methods for extracting data from spreadsheets and datasets created by other programs Character manipulation while sometimes overlooked within R is also covered in detail allowing problems that are traditionally solved by scripting languages to be carried out entirely within R For users with experience in other languages guidelines for the effective use of programming constructs like loops are provided Since many statistical modeling and graphics functions need their data presented in a data frame techniques for converting the output of commonly used functions to data frames are provided throughout the book Data Manipulation in R Stephanie Locke, 2017-12-14 Continue your data science journey today Discover how to systematically process and analyse data a vital skill for a data scientist This series of books takes you through everything you need to know and starts off with the very basics The second book gives you a thorough grounding in analysing data From preparing it so you can go on to applying machine learning algorithms to producing high level analysis this book gives you what you need You ll be equipped to work with common data sources like spreadsheets and databases process data and pass it on to others Great stuff I learned lots of new things including some advanced wrangling that I had not seen covered elsewhere This book packs a lot in covering all the essential requirements for day to day working with R This book will definitely help those transitioning from spreadsheets to become proficient with R John MacKintosh Whether you re looking to become more productive with data analysis or you d like to learn machine learning and statistics this book gives you a rock solid foundation in wrangling data that will enable you to grow and achieve your goals Data

Manipulation With R William Jayden, 2017-06-03 This book starts with the installation of R and how to go about using R and its libraries. We then discuss the mode of R objects and its classes and then highlight different R data types with their basic operations. The primary focus on group wise data manipulation with the split apply combine strategy has been explained with specific examples. The book also contains coverage of some specific libraries such as lubridate, reshape2, plyr, dplyr, stringr and sqldf. You will not only learn about group wise data manipulation but also learn how to efficiently handle date string and factor variables along with different layouts of datasets using the reshape2 package. By the end of this book you will have learned about text manipulation using stringr, how to extract data from twitter using twitteR library, how to clean raw data and how to structure your raw data for data mining.

Statistical Models and Methods for Financial Markets Tze Leung Lai, Haipeng Xing, 2008-09-08 The idea of writing this book arose in 2000 when the first author was assigned to teach the required course STATS 240 Statistical Methods in Finance in the new M.S. program in financial mathematics at Stanford which is an interdisciplinary program that aims to provide a master's level education in applied mathematics, statistics, computing, finance and economics. Students in the program had different backgrounds in statistics. Some had only taken a basic course in statistical inference while others had taken a broad spectrum of M.S. and Ph.D. level statistics courses. On the other hand, all of them had already taken required core courses in investment theory and derivative pricing and STATS 240 was supposed to link the theory and pricing formulas to real world data and pricing or investment strategies. Besides students in the program, the course also attracted many students from other departments in the university, further increasing the heterogeneity of students as many of them had a strong background in mathematical and statistical modeling from the mathematical, physical and engineering sciences but no previous experience in finance. To address the diversity in background but common strong interest in the subject and in a potential career as a quant in the financial industry, the course material was carefully chosen not only to present basic statistical methods of importance to quantitative finance but also to summarize domain knowledge in finance and show how it can be combined with statistical modeling in financial analysis and decision making. The course material evolved over the years, especially after the second author helped as the head TA during the years 2004 and 2005.

Computational Methods for Time-Series Analyses in Earth Sciences Silvio José Gumiere, Hossein Bonakdari, 2025-06-27 Computational Methods for Time Series Analyses in Earth Sciences bridges the gap between theoretical knowledge and practical application, offering a deep dive into the utilization of R programming for managing, analyzing and forecasting time series data within the realm of Earth sciences. It systematically unfolds the layers of data manipulation, graphical representation and sampling to prepare the reader for complex analyses and predictive modeling from the basics of signal processing to the nuances of machine learning. It presents cutting edge techniques such as neural networks, kernel based methods and evolutionary algorithms specifically tailored to tackle challenges and provides practical case studies to aid readers with utilizing the techniques covered. Computational Methods for Time Series Analyses in Earth

Sciences is a valuable resource for scientists researchers and students delving into the intricacies of Earth's environmental patterns and cycles through the lens of computational analysis and guides readers through various computational approaches to deciphering spatial and temporal data Focuses on the use of R for time series analysis and the application of these methods directly to Earth and environmental datasets Integrates Machine Learning techniques enabling readers to explore advanced computational methods for forecasting and modeling Includes case studies with real world applications providing readers with examples on how to translate computational skills into tangible outcomes

Introduction to Data

Technologies Paul Murrell, 2009-02-23 Providing key information on how to work with research data Introduction to Data Technologies presents ideas and techniques for performing critical behind the scenes tasks that take up so much time and effort yet typically receive little attention in formal education With a focus on computational tools the book shows readers how to improve their

Practical R 4 Jon Westfall, 2021-05-14 Get started with an accelerated introduction to the R ecosystem programming language and tools including R script and RStudio This book teaches you how to get data into R and how to work with that data using R Once grounded in the fundamentals the rest of Practical R 4 dives into specific projects and examples starting with running and analyzing a survey using R and LimeSurvey Next you'll carry out advanced statistical analysis using R and MouseLab Web Then you'll see how R can work for you without statistics including how R can be used to automate data formatting manipulation reporting and custom functions The final part of this book discusses using R on a server you'll build a script with R that can run an RStudio Server and monitor a report source for changes to alert the user when something has changed This project includes both regular email alerting and push notification And finally you'll use R to create a customized daily rundown report of a person's most important information such as a weather report daily calendar to do's and more This demonstrates how to automate such a process so that every morning the user navigates to the same web page and gets the updated report What You Will Learn Set up and run an R script including installation on a new machine and downloading and configuring R Turn any machine into a powerful data analytics platform accessible from anywhere with RStudio Server Write basic R scripts and modify existing scripts to suit your own needs Create basic HTML reports in R inserting information as needed Build a basic R package and distribute it Who This Book Is For Some prior exposure to statistics programming and maybe SAS is recommended but not required

How to Design, Analyse and Report Cluster Randomised Trials in Medicine and Health Related Research Michael J. Campbell, Stephen J. Walters, 2014-03-28 A complete guide to understanding cluster randomised trials Written by two researchers with extensive experience in the field this book presents a complete guide to the design analysis and reporting of cluster randomised trials It spans a wide range of applications trials in developing countries trials in primary care trials in the health services A key feature is the use of R code and code from other popular packages to plan and analyse cluster trials using data from actual trials The book contains clear technical descriptions of the models used and considers in detail the ethics involved in such trials and the problems in

planning them For readers and students who do not intend to run a trial but wish to be a critical reader of the literature there are sections on the CONSORT statement and exercises in reading published trials Written in a clear accessible style Features real examples taken from the authors extensive practitioner experience of designing and analysing clinical trials Demonstrates the use of R Stata and SPSS for statistical analysis Includes computer code so the reader can replicate all the analyses Discusses neglected areas such as ethics and practical issues in running cluster randomised trials How to Design Analyse and Report Cluster Randomised Trials in Medicine and Health Related Research provides an excellent reference tool and can be read with profit by statisticians health services researchers systematic reviewers and critical readers of cluster randomised trials
