David Brower The Making Of The Environmental Movement:

David Brower Tom Turner, 2015-10-01 In this first comprehensive authorized biography of David Brower a dynamic leader in the environmental movement over the last half of the twentieth century Tom Turner explores Brower's impact on the movement from its beginnings until his death in 2000. Frequently compared to John Muir, David Brower was the first executive director of the Sierra Club, founded Friends of the Earth, and helped secure passage of the Wilderness Act among other key achievements. Tapping his passion for wilderness and for the mountains he scaled in his youth, he was a central figure in the creation of the Point Reyes National Seashore and of the North Cascades and Redwood national parks. In addition, Brower worked tirelessly in successful efforts to keep dams from being built in Dinosaur National Monument and the Grand Canyon. Tom Turner began working with David Brower in 1968 and remained close to him until Brower's death. As an insider, Turner creates an intimate portrait of Brower, the man, and the decisive role he played in the development of the environmental movement. Culling material from Brower's diaries, notebooks, articles, books, and published interviews, and conducting his own interviews with many of Brower's admirers, opponents, and colleagues, Turner brings to life one of the movement's most controversial and complex figures. *Let the Mountains Talk, Let the Rivers Run* David

Brower, 2017-12-16 As a climber, David Brower scaled many previously insurmountable mountains. As a conservationist, Brower has brought a mountaineer's determination and reverence for nature to his efforts to protect the Earth and educate its human inhabitants. He has kept dams out of the Grand Canyon and loggers out of Olympic National Park, established the National Wilderness Preservation System, added seven new regions to the National Park System, and helped to foster a mind set that questions careless growth. In *Let the Mountains Talk, Let the Rivers Run*, the archdruid of modern environmentalism, the man *The New York Times* designated the most effective conservation activist in the world, offers a tough, witty, and impassioned game plan for those who would save the Earth. Now eighty-two years old, Brower also recounts the highs and lows of his controversial career, sparing no politician or public figure, least of all himself. He frankly discusses his mistakes, such as compromising on the construction of Glen Canyon Dam, and the strategic flourishes that have earned him both fans and foes, including the full-page in-your-face national newspaper ads that helped save the Grand Canyon by asking, "Should we also flood the Sistine Chapel so that tourists can get a better look at the ceiling?" _____ Delightful. Brower's vignettes offer Zen-like wisdom. *San Francisco Chronicle* This is the testament of one of the few authentic sages of our time. Brower's voice is passionate, perfectly cadenced, humorous, and very wise. And original. While most writers point to where we are, this one draws the map. Edward O. Wilson, Pellegrino University Professor, Harvard, and the author of *The Diversity of Life*, *Half Earth*, and *The Meaning of Human Existence*. David Brower has for many years been a force of nature, drawing us to see the natural world as nurturer, teacher, inspirer, and partner. He has been the pathbreaker, not given to easy answers or ruinous compromises, a man of great insight who cares deeply for his world. President Jimmy Carter. Brower is on the short list of people who transformed

the 20th Century the man who turned conservationism into environmentalism who took the insights of Rachael Carson and built from them a powerful idea that may yet transform the planet Bill McKibben 350.org and author of *The End of Nature* It is the best distillation of the Brower philosophy yet in print Tom Turner DAVID BROWER *The Making of the Environmental Movement* Steve Chapple is the author of the New York Times Notable Book *Kayaking the Full Moon A Journey Down the Yellowstone River to the Soul of Montana* and co author with Jeremy Jackson of *BREAKPOINT Reckoning with America's Environmental Crises* Yale University Press [Rethinking the American Environmental Movement post-1945](#) Ellen Spears, 2019-06-28 *Rethinking the American Environmental Movement post 1945* turns a fresh interpretive lens on the past drawing on a wide range of new histories of environmental activism to analyze the actions of those who created the movement and those who tried to thwart them Concentrating on the decades since World War II environmental historian Ellen Griffith Spears explores environmentalism as a field of movements rooted in broader social justice activism Noting major legislative accomplishments strengths and contributions as well as the divisions within the ranks the book reveals how new scientific developments the nuclear threat and pollution as well as changes in urban living spurred activism among diverse populations The book outlines the key precursors events participants and strategies of the environmental movement and contextualizes the story in the dramatic trajectory of U.S. history after World War II The result is a synthesis of American environmental politics that one reader called both ambitious in its scope and concise in its presentation This book provides a succinct overview of the American environmental movement and is the perfect introduction for students or scholars seeking to understand one of the largest social movements of the twentieth century up through the robust climate movement of today

Ryan, 2022-09-01 The story of how America's public lands our city parks national forests and wilderness areas came into being can be traced to a few conservation pioneers and proteges who shaped policy and advocated for open spaces Some like Frederick Law Olmsted and Gifford Pinchot are well known while others have never been given their due Jeffrey Ryan covers the nearly century long period between 1865 when Olmsted contributed to the creation of Yosemite as a park and created its management plan to the signing of the Wilderness Act of 1964 Olmsted influenced Pinchot who became the first head of the National Forest Service and in turn Pinchot hired the foresters who

became the founders of The Wilderness Society and creators of the Wilderness Act itself This history emphasizes the cast of characters among them Theodore Roosevelt Bob Marshall Benton MacKaye Aldo Leopold and Howard Zahniser and provides context for their decisions and the political and economic factors that contributed to the triumphs and pitfalls in the quest to protect public lands In researching the book Ryan traveled to the places where these crusaders lived worked and were inspired to take up the cause to make public lands accessible to all **This Green and Growing Land** Kevin C.

Armitage,2017-12-01 From Benjamin Franklin s campaign to combat pollution at the Philadelphia s docks in the 1750s to the movement against climate change today American environmentalists have sought to protect the natural world and promote a healthy human society In **This Green and Growing Land** historian Kevin Armitage shows how the story of American environmentalism part philosophy part social movement is in no small way a story of America itself of the way citizens have self organized have thought of their communities and their government and have used their power to protect and enrich the land Armitage skillfully analyzes the economic and social forces begetting environmental change and emphasizes the responses of a variety of ordinary Americans as well as a few well known leaders to these complex issues This concise and engaging survey of more than 250 years of activism tells the story of a magnificent American achievement and the ongoing problems that environmentalism faces **Saving the Sacred Sea** Kate Pride Brown,2018 Civil society is a loaded concept

in Russia during the Soviet period the voices that heralded civil society were the same ones that demanded the Union s dissolution So for the Kremlin civil society is not the guarantor of democracy but a force that has the power to end governments This book looks at how civil society negotiates power on a global stage under Russia s authoritarian regime and in a particularly isolated and remote part of the world within environmental activism around Lake Baikal in Siberia More than a mile deep Lake Baikal is the oldest deepest and most voluminous lake on the Earth and home to thousands of endemic species It is also ecologically unique in that it is oxygenated to its maximum depth and supports life even at the lake floor a phenomenon occurring nowhere else on the planet The lake is not just a natural wonder but home to a strong environmentalist community that works tirelessly to protect the lake from human harm Environmentalism at Baikal began in the late 1950s eventually igniting the first national protest in the USSR They have remained active in some form ever since across the years of chaos instability and crisis from the opening of Russia to the forces of globalization to the authoritarianism of Putin in the present This book examines the struggle of Baikal environmentalists to develop a new understanding of civil society under conditions of globalization and authoritarianism Through extended historically informed ethnographic analysis Kate Pride Brown argues that civil society is engaged with political and economic elites in a dynamic struggle within a field of power Understanding the field of power helps to explain a number of contradictions For example why does civil society seem to both bolster democracy and threaten it Why do capitalist corporations and environmental organizations form partnerships despite their general hostility toward each other And why has democracy proven to be so

elusive in Russia The field of power posits new answers to these questions as Baikal environmental activists struggle to protect and save their Sacred Sea **1968** Robert C. Cottrell, Blaine T. Browne, 2018-05-18 The year 1968 retains its mythic hold on the imagination in America and around the world Like the revolutionary years 1789 1848 1871 1917 and 1989 it is recalled most of all as a year when revolution beckoned or threatened On the 50th anniversary of that tumultuous year cultural historians Robert Cottrell and Blaine T Browne provide a well informed up to date synthesis of the events that rocked the world emphasizing the revolutionary possibilities more fully than previous books For a time it seemed as if anything were possible that utopian visions could be borne out in the political cultural racial or gender spheres It was the year of the Tet Offensive the Resistance the Ultra Resistance the New Politics Chavez and RFK breaking bread LBJ s withdrawal student revolt barricades in Paris the Prague Spring SDS sharp turn leftward communes the American Indian Movement the Beatles Revolution the Stones Street Fighting Man The Population Bomb protest at the Miss America pageant and Black Power at the Mexico City Olympics 1968 was also the year of My Lai the assassinations of Martin Luther King Jr and Robert F Kennedy Warsaw Pact tanks in Czechoslovakia the police riot in Chicago the Tlatelolco massacre Reagan s belated bid Wallace s American Independent Party campaign Love It or Leave It and the backlash that set the stage at year s end for Richard Milhous Nixon s ascendancy to the White House For those readers reliving 1968 or exploring it for the first time Cottrell and Browne serve as insightful guides weaving the events together into a powerful narrative of an America and a world on the brink **The Ecocentrists** Keith Makoto Woodhouse, 2018-06-05 Disenchanted with the mainstream environmental movement a new more radical kind of environmental activist emerged in the 1980s Radical environmentalists used direct action from blockades and tree sits to industrial sabotage to save a wild nature that they believed to be in a state of crisis Questioning the premises of liberal humanism they subscribed to an ecocentric philosophy that attributed as much value to nature as to people Although critics dismissed them as marginal radicals posed a vital question that mainstream groups too often ignored Is environmentalism a matter of common sense or a fundamental critique of the modern world In *The Ecocentrists* Keith Makoto Woodhouse offers a nuanced history of radical environmental thought and action in the late twentieth century United States Focusing especially on the group Earth First Woodhouse explores how radical environmentalism responded to both postwar affluence and a growing sense of physical limits While radicals challenged the material and philosophical basis of industrial civilization they glossed over the ways economic inequality and social difference defined people s different relationships to the nonhuman world Woodhouse discusses how such views increasingly set Earth First at odds with movements focused on social justice and examines the implications of ecocentrism s sweeping critique of human society for the future of environmental protection A groundbreaking intellectual history of environmental politics in the United States *The Ecocentrists* is a timely study that considers humanism and individualism in an environmental age and makes a case for skepticism and doubt in environmental thought **The Activist 1960s** Robert C. Cottrell, 2023-05-11

Throughout the Long Sixties which spanned much of the seemingly quiescent 1950s and continued into the 1970s progressive activists sought to change American policy both foreign and domestic Beginning with a civil rights crusade that later expanded to a campaign against the Vietnam War the movement eventually splintered into a series of focuses racial ethnic demographic political cultural gender based and environmental This work details activists efforts to ensure basic rights through fostering civic engagement Chapters demonstrate how the various campaigns within the movement were all successful to some extent but none brought about the results that many desired Nonetheless they contributed to a more open egalitarian participatory and emancipated nation that is still being shaped today

The Top Books of the Year David Brower The Making Of The Environmental Movement The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the engaging narratives that have charmed audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and gripping novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
