Wingate, 2016-12-31 Every individual develops physically and psychologically through distinct stages of life With each stage grows a wider perspective of self and the world around us In Circuits and Shen models of the evolution of consciousness and Chinese medicine the spectrum of human consciousness is explored from the view of the eight circuit model of the brain and the holonomic theory of development It is shown how these relate to brain development psychoneuroendocrinology and holding patterns of the fascial networks throughout the body as well as Eastern subtle body systems Utilizing this information it becomes possible to lay out a systematic means of informing Chinese medical practitioners and bodyworkers in approaches aimed at treating negative imprints psychological impacts or physical illnesses that may develop out of each stage **Breathing, Mudras and Meridians** Bill Harvey, 2021-07-22 The word embodied is one of those terms such as grounded or centered that can be discussed forever without being experienced Defining embodiment though can be quite tricky because much of what is taught in western societies about the body devalues the felt experience The categories of formal learning particularly anatomy and physiology are taught with the fundamental source being cadavers dead bodies and conceptualizations that do

not include our own vitality or life force Without the felt experience embodiment is just another concept that can be discussed ad nauseum The felt experience or phenomenology in academic speak is the path away from these endless discussions and conceptual befuddlement This book provides a basic training on how to become aware of our physiological functioning and our sense of vitality A part of this training comes from becoming hyper aware of how we breathe This awareness makes it possible to feel our own organs and how they function and interrelate To help us refine our awarenesses of our own organs we are entirely fortunate to learn and practice methods developed over thousands of years by Indian and Chinese cultures With these fundamentals this book leads us through a series of connected experiences using mudras to feel our organs the flows of our life force Qi and the flow of that life force through our meridians From that we learn to feel our own chakras and sushumna central channel and our ability to perceive our connections with our environment and ecosystem This then provides the basis for a body sense of our spiritual existence and development Thus the definition of embodiment evolves into deeper awareness within our bodies and deeper connection to the world Science and the Dao Livia Kohn, 2016 *Working with Death and Loss in Shiatsu Practice* Tamsin Grainger, 2020-08-21 This book considers death and loss within Chinese Medicine and related Taoist models and offers practical advice and techniques effective recommendations and appropriate exercises for those working in palliative care with grieving frail or dying clients Grainger examines the different ways that practitioners might encounter death and loss including working in end of life care with those facing terminal illness affected by bereavement suicide or miscarriage in the context of different ages religious and cultural backgrounds and offers a model for teaching *Working with Death and Loss in Shiatsu Practice* is the go to text for practitioners wishing to improve their expertise and confidence when working with people at a vulnerable time in a respectful open hearted and compassionate manner *Chinese Medical Qigong Therapy: Prescription exercises and meditations, treatment of internal diseases, pediatrics, geriatrics, gynecology, neurology, and energetic psychology* Jerry Alan Johnson, 2002 The information contained within the Chinese Medical Qigong Therapy A Comprehensive Clinical Text has currently been tripled and reformatted into five exciting new textbooks The five new Medical Qigong textbooks are composed of both modern and ancient knowledge graphics and expanded techniques guaranteed to fascinate and intrigue the reader Never before in the history of Chinese Medicine has a textbook series been made available to the public that includes such comprehensive and thorough understandings on ancient Chinese energetic healing techniques Written by an internationally recognized Grand Master of Martial Medical and Spiritual Qigong training this five textbook series often referred to as the Medical Qigong Encyclopedia provides the first complete explanation of ancient Chinese esoteric theory that has for centuries eluded and confounded the West This fourth textbook includes a thorough understanding of ancient Daoist and Buddhist energetic exercises secret meditations and advanced energetic theories as well as many other aspects of training related to the practical applications of Chinese energetic medicine This text also covers a wide range of energetic treatment
