Body and Face in Chinese Visual Culture Hung Wu, Katherine R. Tsiang, 2020-03-17 Traditionally the Chinese body was approached as a totality and explained by sweeping comparisons of the differences that distinguished Chinese examples from their Western counterparts

Recently scholars have argued that we must look at particular examples of Chinese images of the body and explore their intrinsic conceptual complexity and historical specificity. The twelve contributors to this volume adopt a middle position. They agree that Chinese images are conditioned by indigenous traditions and dynamics of social interaction but they seek to explain a general Chinese body and face by charting multiple specific bodies and faces. All of the chapters are historical case studies and investigate particular images such as Han dynasty tomb figurines, Buddhist texts and illustrations, pictures of deprivation, illness, deformity and ghosts, clothing, formal portraiture and modern photographs and films. From the diversity of art forms and historical periods studied, there emerges a more complex picture of ways that the visual culture of the body and face in China has served to depict the living, memorialize the dead and present the unrepresentable in art.

Chinese Painters: A Critical Study Raphaël Petrucci, 2019-11-26. Petrucci's literary style is both accessible and scholarly, employing vivid descriptions while engaging with complex ideas, making this work a significant contribution to the field of art criticism. He situates Chinese painting within the broader currents of global art, enabling readers to grasp its place in both Eastern and Western traditions. Raphaël Petrucci is a distinguished art historian whose extensive studies in Asian art have equipped him with a profound understanding of the nuances of Chinese culture. His academic journey, which includes years of research in China and a deep personal connection to its history, informs this critical exploration. Petrucci's previous works have earned acclaim for their insightful analyses, cementing his status as a foremost voice in contemporary art studies. Recommended for artists, historians, and general readers alike, *Chinese Painters* invites you to engage with a rich tapestry of visual expression. This book serves not only as a scholarly resource but also as a thought-provoking exploration of the cultural dialogues that continue to resonate through the medium of painting, making it an essential read for anyone interested in the interplay between art and society.

This volume of the *Biographical Dictionary of Chinese Women* completes the four-volume project and contains more than 400 biographies of women active in the Tang through Ming dynasties (618-1644). Many of the entries are the result of original research and provide the only substantial information on women available in English. Of note is the inclusion of a large number of women who reached positions of authority during this period, as well as women artists and writers, especially poets, during this period of increased female literacy and more liberal social attitudes to women's cultural roles. Wherever possible, entries incorporate translations of poems and sometimes prose works so as to let the women speak for themselves. The book also includes a multitude of entertainers and actresses.
