Definition

Comparative public policy is an area of interdisciplinary study which uses public policy as its major unit of analysis for comparison across different systems and institutions, usually countries or governments. It typically asks questions about how, why, and to what effect different governments pursue different or similar policies. It faces problems of contested identities of method versus field and the lack of a coherent and comprehensive theoretical framework. These problems are being addressed by its emerging research, which also contributes to the creation of integrated and impactful knowledge in social science.

Introduction

Comparative public policy is an important area of study cutting across major disciplines in social science (Adolino and Blake 2011; Castles 1998; Heidenheimer et al. 1990; Rose 2005). It carries both academic and policy significance. In recent years, it is gaining strength and influence because of the growing awareness of the limitation of isolated and compartmentalized knowledge of traditional academic disciplines in policy applications and the pressing need to acquire theory-guided and empirically proven knowledge for resolving serious policy problems under a globalized environment.

Many traditional disciplines of social sciences often select their research questions based on their disciplinary interest and conduct the analysis following their own logic of theoretical inquiry. A single theoretical lens inevitably narrows the comprehensiveness and scope of its inquiry. While compartmentalization of knowledge can be taken as specialization of knowledge and gives the advantage of theoretical strength of a disciplinary approach, compared with an interdisciplinary approach, their outputs of research are often too partial and fragmented for providing a complete analysis of a public problem to meet the expectations of scholars and practitioners of policymaking (Raadschelders 2005; Riggs 1991, 1998; Welch and Wong 1998).

Advance in comparative public policy research holds the promise of moving both theory and
