Cosmonauts Douglas Millard:

Cosmonauts John E. Bowl, 2014 Published to accompany the exhibition held at the Science Museum London 2014

Cosmonaut Cathleen S. Lewis, 2023-08-08 Examining material and cultural representations of the cosmonaut program Cathleen Lewis discusses how the public image of the Soviet cosmonaut developed beginning in the 1950s and the ways this icon has been reinterpreted throughout the years and in contemporary Russia

The Cosmonaut Who Couldn't Stop Smiling Andrew L. Jenks, 2019-01-15 Let's go With that the boyish grinning Yuri Gagarin launched into space on April 12 1961 becoming the first human being to exit Earth's orbit The twenty seven year old lieutenant colonel departed for the stars from within the shadowy world of the Soviet military industrial complex Barbed wires no entry placards armed guards false identities mendacious maps and a myriad of secret signs had hidden Gagarin from prying outsiders not even his friends or family knew what he had been up to Coming less than four years after the Russians launched Sputnik into orbit Gagarin's voyage was cause for another round of capitalist shock and Soviet rejoicing The Cosmonaut Who Couldn't Stop Smiling relates this twentieth century icon's remarkable life while exploring the fascinating world of Soviet culture Gagarin's flight brought him massive international fame in the early 1960s he was possibly the most photographed person in the world flashing his trademark smile while rubbing elbows with the varied likes of Nehru Castro Queen Elizabeth II and Italian sex symbol Gina Lollobrigida Outside of the spotlight Andrew L. Jenks reveals his tragic and mysterious death in a jet crash became fodder for morality tales and conspiracy theories in his home country and long after his demise his life continues to provide grist for the Russian popular culture mill This is the story of a legend both the official one and the one of myth which reflected the fantasies perversions hopes and dreams of Gagarin's fellow Russians With this rich lively chronicle of Gagarin's life and times Jenks recreates the elaborately secretive world of space age Russia while providing insights into Soviet history that will captivate a range of readers

Satellite Doug Millard, 2016-11-15 Right now above our heads nearly imperceptible to us but hugely important to how we live are thousands of man made objects that we have sent into space Ubiquitous but mysterious satellites are the technological infrastructure of our globally connected world helping us do everything from orient ourselves on a map to watch our favorite television shows Yet we rarely ever think about them In this book Doug Millard pays overdue tribute to the stoic existence of the satellite tracing its simultaneous pathways through the cold silence of space and the noisy turbulence of the past century How satellites ever came to be is in itself a remarkable story Telling an astonishing history of engineering experimentation and ingenuity Millard shows how the Cold War space race made the earliest satellites ones like Sputnik Telstar and Early Bird household names He describes how they evolved into cultural signifiers that represented not only our scientific capabilities but our capacity for imagination our ability to broaden the scope of our vision to the farthest reaches From there he follows the proliferation of satellites in the second half of the twentieth century examining their many different forms how they evolved all the things they do what they have enabled and

how they have influenced our popular culture Ultimately Millard asks what we can still expect what sort of space age the satellite has initiated that is yet to be fully realized Published in association with the Science Museum London this beautifully illustrated book will appeal to any fan of space exploration and technology **The Earth Gazers** Christopher

Potter,2018-02-06 Only twenty four people have seen the whole earth The most beautiful and influential photographs ever made were taken almost as an afterthought by the astronauts of the Apollo space program from the moon They inspired a generation of scientists and environmentalists to think more seriously about our responsibility for this tiny oasis in space this blue marble falling through empty darkness The Earth Gazers is a book about the long road to the capture of those unforgettable images It is a history of the space program and of the ways in which it transformed our view of the earth and changed the lives of the astronauts who walked in space and on the moon It is the story of the often blemished visionaries who inspired that journey into space Charles Lindbergh Robert Goddard and Wernher Von Braun and of the courageous pilots who were the first humans to escape the Earth's orbit These twenty four people saw Earth in all its singular glory and the legacy of the stories of these Earth Gazers resonate richly even today Laboratory Lifestyles Sandra

Kaji-O'Grady,Chris L. Smith,Russell Hughes,2019-02-05 A generously illustrated examination of the boom in luxurious resort style scientific laboratories and how this affects scientists work The past decade has seen an extraordinary laboratory building boom This new crop of laboratories features spectacular architecture and resort like amenities The buildings sprawl luxuriously on verdant campuses or sit sleekly in expensive urban neighborhoods Designed to attract venture capital generous philanthropy and star scientists these laboratories are meant to create the ideal conditions for scientific discovery Yet there is little empirical evidence that shows if they do Laboratory Lifestyles examines this new species of scientific laboratory from architectural economic social and scientific perspectives Generously illustrated with photographs of laboratories and scientists at work in them the book investigates how lifestyle science affects actual science Are scientists working when they stretch in a yoga class play volleyball in the company tournament chat in an on site caf or show off their facilities to visiting pharmaceutical executives The book describes among other things the role of beanbag chairs in the construction of science at Xerox PARC the Southern California vibe of the RAND Corporation Malibu General Atomic La Jolla and Hughes Research Laboratories Malibu and Biosphere 2's astronauts as both scientists and scientific subjects and interstellar laboratories Laboratory Lifestyles the title is an allusion to Bruno Latour and Steve Woolgar's influential Laboratory Life documents a shift in what constitutes scientific practice these laboratories and their lifestyles are as experimental as the science they cultivate Contributors Kathleen Brandt Russell Hughes Tim Ivison Sandra Kaji O Grady Stuart W Leslie Brian Lonsway Sean O Halloran Simon Sadler Chris L Smith Nicole Sully Ksenia Tatarchenko William Taylor Julia Tcharfas Albena Yaneva Stelios Zavos Soviet Space Culture E. Maurer,J. Richers,M. Rüthers,C. Scheide,2011-08-16 Starting with the first man made satellite Sputnik in 1957 and culminating four years later with the first human in space Yuri

Gagarin space became a new utopian horizon This book explores the profound repercussions of the Soviet space exploration program on culture and everyday life in Eastern Europe especially in the Soviet Union itself Voices of the Soviet Space Program S. Gerovitch,2014-12-16 In this remarkable oral history Slava Gerovitch presents interviews with the men and women who witnessed Soviet space efforts firsthand Rather than comprising a master narrative these fascinating and varied accounts bring to light the often divergent perspectives experiences and institutional cultures that defined the Soviet space program **Limiting Outer Space** Alexander C.T. Geppert,2018-04-18 Limiting Outer Space propels the historicization of outer space by focusing on the Post Apollo period After the moon landings disillusionment set in Outer space no longer considered the inevitable destination of human expansion lost much of its popular appeal cultural significance and political urgency With the rapid waning of the worldwide Apollo frenzy the optimism of the Space Age gave way to an era of space fatigue and planetized limits Bringing together the history of European astroculture and American Soviet spaceflight with scholarship on the 1970s this cutting edge volume examines the reconfiguration of space imaginaries from a multiplicity of disciplinary perspectives Rather than invoking oft repeated narratives of Cold War rivalry and an escalating Space Race Limiting Outer Space breaks new ground by exploring a hitherto underrated and understudied decade the Post Apollo period
