China And The World Global Crisis Of Capitalism:

China and the World Ben Mah, 2011-10-19 Ben Mah's book is an excellent warning of the problems indeed economic depth charges that were planted in China by the neoliberals who have destroyed nearly every economy where their advice was followed Ben Mah's *China and the World* describes what China should accept and what it should reject in Western advice Michael Hudson Distinguished Professor of Economics at the University of Missouri Mr Ben Mah is an acute observer This book explodes the myth of China's Rise reveals the truth about how China's economic policies have been misguided by neoliberalism This is a good book that anyone concerned about China's future should not miss Genliang Jia Professor Peoples University of China Andong Zhu The essays in this book deserve great attention Dajun Zhong renowned economist Mr Mah's work could help us re think the related policies and eliminate the influence of neoliberal ideology Andong Zhu Director Qinghua University China Mr Mah's work is a biting revelation of the unpleasant reality that lies behind such currently popular buzzwords as privatization marketization freedom of capital flow and free trade Haibo Liu Chinese Academy of Social Sciences **The State-Capital Nexus in the Global Crisis** Bastiaan van Apeldoorn, Naná de Graaff, Henk W. Overbeek, 2017-07-05

In the wake of the outbreak of the global crisis in 2008 many observers expected the state to assume command over a faltering neoliberal finance led model of capitalism We now know that this expectation was by and large mistaken There is indeed an ongoing re calibration of the state capital relations but in many instances the state has become more actively and more deeply involved in extending the reach of markets rather than in constraining markets in the interests of an equitable response to the crisis This volume offers both theoretical perspectives and empirical studies by a selection of leading Critical International Political Economy scholars on the question how and to what extent we are witnessing a return of the state and a transition towards a new phase of global capitalism The chapters cover a wide array of topics from the rise of China and other emerging economies of the Global South the role of state owned enterprises such as Sovereign Wealth Funds and National Oil Companies and global environmental politics to the role of labour in Europe and US grand strategy foreign policy making in the post Cold War period This book was published as a special issue of *Globalizations*

The Global Capitalist Crisis and Its Aftermath Berch Berberoglu, 2016-12-05 Written by a team of experts on the contemporary global capitalist political economy who are able to shed light on the inner workings of global capitalism and the capitalist globalization process that has led to the growth and development of capitalism from the national to the global level this groundbreaking volume provides critical analyses of the causes and consequences of the Great Recession of 2008 2009 Through a careful examination of the origin development and aftermath of the catastrophic economic crisis from which the world is still trying to recover editor Berch Berberoglu and his colleagues demonstrate that those most responsible for the economic collapse are the ones least affected by its devastating impact felt most severely by working people around the world Ultimately this book argues that it is only through the systematic restructuring of the world economy by the working

class that society will be able to prevent the boom and bust cycle of global capitalist crises and usher in a more egalitarian socialist economy and society

The Dark Side of Globalisation Leila Simona Talani, Roberto Roccu, 2019-03-28 Firmly rooted in the International Political Economy IPE tradition this book addresses the negative consequences of globalisation what is termed here the dark side of globalisation It explores different definitions of globalisation whether the globalisation we have seen since the 1970s is substantially new and to what extent it can be governed Building on these foundations the work assesses the prospects for de globalisation By focusing on this dark side of globalisation the authors show how the global economic crisis and its various local and sectorial manifestations intensified rather than generated existing trends This scholarship provides an account of the current predicament that is both more complex and more persuasive than the opposition between globalisation and de globalisation

China, the USA and Capitalism's Last Crusade William Briggs, 2021-10-29 As the sun rises on China and sets on America the world holds its breath China the USA and Capitalism's Last Crusade looks at the rise of China and the decline of the USA but from a different angle William Briggs argues that this struggle for economic supremacy is being played out against a much bigger backdrop the decline of the economic structure of capitalism In this sense the decline of the USA is portrayed as that larger economic decline in microcosm Briggs examines the relationship between state and capital of how capitalism came to dominate the world and of the historical political and economic rise of both the USA and China He shows that the struggle between the two nations has little to do with cultural historical demographic political or ideological differences but with what they have in common Despite the portrayal of China as being socialist it functions as a capitalist economy in the globalised capitalist world While its journey to capitalism may have differed the end point is the same and this is why there is such animosity such conflict such acrimony between the two states

The Rise of China and the Demise of the Capitalist World-Economy Minqi Li, 2008-10-20 China's increasing power in the global economy is destabilizing the established system This book analyses the possible historical trajectories of China and the capitalist world economy in the twenty first century Minqi Li examines the future global prospects from the perspectives of Marxism world system theories and ecological limits to growth He argues that China is likely to exacerbate many of the major contradictions of world capitalism which could lead to the demise of the existing world system This is an essential text for students of political economy economics and global politics

A New Global Geometry? Greg Albo, 2024-06-18 Scrutinizes possibilities for an equalised global order in light of recent conflicts between the world's major powers The post Cold War era is definitively over asserted US President Joe Biden as he launched the new National Security Strategy warning in late 2022 that a competition is underway between the major powers to shape what comes next American leadership the document declared would be more necessary than ever to define the future of the international order insisting that the US must marshal its unparalleled economic military and diplomatic resources to confront its geopolitical rivals

Socialist Register 2024 A New Global Geometry takes stock of momentous changes on the horizon Even if these geopolitical

shifts do not spell the end of globalization how might they alter its historical trajectory While it is premature to speak of the end of the liberal economic order let alone the development of a multipolar international system can we begin to assess the dimensions of a new global geometry And how might we assess the potential vulnerabilities of socialist movements worldwide alongside the potential resistance our movements might manage to present grounded in our historical demands for a democratic and equalizing world order

The Politics of Time in China and Japan Viren Murthy, 2022-06-24 Drawing on a wide range of texts and using an interdisciplinary approach this volume shows how Chinese and Japanese intellectuals mobilized the past to create a better future It is especially significant today given a world where amidst tensions within Asia and the rise of China East Asian intellectuals and governments constantly find new political meanings in their traditions The essays illuminate how throughout Chinese and Japanese history thinkers constantly weaved together nationalism internationalism and a politics of time This volume explores a broad range of subjects such as premodern and early modern attempts to conjure a politics of Confucianism twentieth century Japanese Marxist interpretations of Buddhism and Japanese and Chinese endeavors to imagine a new world order In sum this book shows us why understanding East Asian pasts are essential to making sense of ideological trends in contemporary China and Japan For example without understanding Confucianism and how modern intellectuals in China grappled with this body of thought we would be unable to make sense of the Chinese government's current promotion of the Chinese classics This book will interest students and scholars of political science history Asian studies sociology and philosophy

Normalization of U.S.-China Relations William C. Kirby, Robert S. Ross, Gong Li, 2020-03-17 Relations between China and the United States have been of central importance to both countries over the past half century as well as to all states affected by that relationship Taiwan and the Soviet Union foremost among them Only recently however has the opening of archives made it possible to research this history dispassionately The eight chapters in this volume offer the first multinational multi archival review of the history of Chinese American conflict and cooperation in the 1970s On the Chinese side normalization of relations was instrumental to Beijing's effort to enhance its security vis vis the Soviet Union and was seen as a tactical necessity to promote Chinese military and economic interests The United States was equally motivated by national security concerns In the wake of Vietnam policymakers saw normalization as a means of forestalling Soviet power As the essays in this volume show normalization was far from a foregone conclusion

China's Capitalism Tobias ten Brink, 2019-04-05 Since 1978 the end of the Mao era economic growth in China has outperformed every previous economic expansion in modern history While the largest Western economies continue to struggle with the effects of the deepest recession since World War II the People's Republic of China still enjoys growth rates that are massive in comparison In the country's smog choked cities a chaotic climate of buying and selling prevails Tireless expansion and inventiveness join forces with an attitude of national euphoria in which anything seems possible No longer merely the workshop of the world China is poised to become a global engine for innovation In

China's Capitalism Tobias ten Brink considers the history of the socioeconomic order that has emerged in the People's Republic. With empirical evidence and a theoretical foundation based in comparative and international political economy, ten Brink analyzes the main characteristics of China's socioeconomic system over time, identifies the key dynamics shaping this system's structure, and discusses current trends in further capitalist development. He argues that hegemonic state-business alliances, mostly at the local level, relative homogeneity of party-state elites, the maintenance of a low-wage regime, and unanticipated coincidences between domestic and global processes are the driving forces behind China's rise. He also surveys the limits to the state's influence over economic and social developments, such as industrial overcapacity and social conflict. Ten Brink's framework reveals how combinations of three heterogeneous actors—party-state institutions, firms, and workers—led to China's distinctive form of capitalism. Presenting a coherent and historically nuanced portrait, *China's Capitalism* is essential reading for anyone interested in the socioeconomic order of the People's Republic and the significant challenges facing its continuing development.
