China In 2020 A New Type Of Superpower Chinese Edition:

China, the West and the Myth of New Public Management Paolo Urio, 2012 In the West innovations in new public management NPM have been regarded as part of the neoliberal project whilst in China these reforms have emerged from a very different economic and social landscape Despite these differences however similar measures to those introduced in the West have been adopted by the Chinese state which has largely abandoned the planned economy and adopted market mechanisms in the pursuit of improved economic efficiency and growth Evaluating the results of these reforms in both China and the West between 1978 and 2011 this book shows that despite substantial improvements in economic efficiency in both cases under consideration there have been considerable negative impacts on the distribution of wealth access to public services levels of poverty public health and the incidence of crime Further this book explores the different results of NPM in China and the West and the conclusions Paolo Urio draws have timely significance as he suggests that China has been able to change its policies more rapidly and thus more effectively respond to the challenges posed by the current economic crisis Drawing on both Western and Chinese sources this innovative book compares the consequences of their public management reforms taking into account the impact on both the economy and society As such this book will be of great interest to students and scholars working in the fields of Chinese studies Asian studies business economics strategic public management and comparative studies in capitalism and socialism

China Reclaims World Power Status Paolo Urio, 2018-04-09 Using both Chinese and Western theoretical approaches this book analyses the strategies implemented by China for reclaiming power in the international domain Examining domestic measures taken by China to assure its economic and social development it also considers the strengths and weaknesses of its major international opponent the US and analyses their competing approaches to developing power resources and leadership dominance It studies the foreign policies of both China and the US first by going back to the historical origins of their ideological foundations and secondly by analysing their power building from the nineteenth century to the Trump and Xi Jinping presidencies Finally this book focuses on the One Belt One Road Initiative as China's response to putting an end to the world America made and debates the question of whether China will emerge as a new capitalist country embedded in the liberal capitalist world system or as an authoritarian state with a socialist market economy able to change the rules of the international order Providing a comparison of the two major world powers and a comprehensive overview of their relationship this book will be of great interest to students and scholars of Chinese politics and international relations as well as Chinese Studies more generally

The Bloomsbury Handbook of Modern Chinese Literature in Translation Cosima Bruno, Lucas Klein, Chris Song, 2023-10-19 Offering the first systematic overview of modern and contemporary Chinese literature from a translation studies perspective this handbook provides students researchers and teachers with a context in which to read and appreciate the effects of linguistic and cultural transfer in Chinese literary works Translation matters It always has of course but more so when we want to reap the benefits

of intercultural communication In many universities Chinese literature in English translation is taught as if it had been written in English As a result students submit what they read to their own cultural expectations they do not read in translation and do not attend to the protocols of knowing engagements and contestations that bind literature and society to each other The Bloomsbury Handbook of Modern Chinese Literature in Translation squarely addresses this pedagogical lack Organised in a tripartite structure around considerations of textual social and large scale spatial and historical circumstances its thirty plus essays each deal with a theme of translation studies as emerged from the translation of one or more Chinese literary works In doing so it offers new tools for reading and appreciating modern and contemporary Chinese literature in the global context of its translation offering in depth studies about eminent Chinese authors and their literary masterpieces in translation The first of its kind this book is essential reading for anyone studying or researching Chinese literature in translation

The China Model and Global Political Economy Ming Wan, 2014-01-10 Since the beginning of China's phenomenal rise in the international system our knowledge of the country has grown rapidly But those who have debated the China issue in policy circles mostly focus on the implications of China's rise often without a firm understanding of why the country is rising in the first place Using an analytical framework which links China's domestic political economy order and the global system this book helps us to understand China's rise and the China model more clearly Indeed unlike most other works that study the China model as a domestic political economy issue it adopts an explicit international comparative perspective comparing the Chinese model to others such as the Washington Consensus and the Japan model This comparison allows us to break down different components of the China model and to show that while the Chinese Communist Party leadership part of the model is unique other components such as export led growth strategy or packaged aid programs are not By focusing on the root cause of China's rise namely the loop between the evolving China model and an evolving global governance structure this book reveals the degree of compatibility between the country's profit driven domestic political economy system and the post war global economic order and in turn how and why China has been able to rise in the global system The China Model and Global Political Economy makes a key contribution to theories of international relations state development and modernization and as such will appeal to students and scholars of Chinese politics Chinese foreign policy international political economy development studies and international relations

Forecasting China's Future Roger Irvine, 2015-06-26 China's future development is likely to have a huge impact on twenty first century global outcomes It is therefore surprising that thus far so little attention has been given to comparing and evaluating expert forecasts of China's future in the post Mao era This book presents an illuminating and comprehensive summary record of contrasting and competing expert forecasts and judgements about the major issues confronting China within four principal domains political economic environmental and international After considering the principal forecasting methods available to experts the author comments critically on the degree of success achieved in using those methods and emphasises the confusion created by the

polarisation of opinion and by the failure of many experts to accept the high degree of uncertainty that characterises most of the key issues The book recommends a new approach based on the study of a hierarchy of critical uncertainties and on continuing analysis of opposing expert opinions about these uncertainties It emphasises the potential for both positive and negative outcomes for these critical uncertainties and the importance of maximising the potential for positive outcomes through improved analytical and policy frameworks Providing insights for specialists and non specialists into the most critical issues that will determine China s future direction this book will be of particular interest to students and scholars of political economic environmental and international relations issues in China and Asia as well as to readers in business and government

China's Youth Li Chunling, 2021-09-28 Understanding the young adults who came of age during the rise of China s economic and global power This book by a prominent Chinese sociologist explores how China s youth will influence the country s future Focusing on millennials those born between the early 1980s and the mid 1990s the book examines the status lifestyles attitudes values and behaviors of this key segment of the country s population Li Chunling s study presents a native Chinese perspective on the increasingly diverse generation that at some point will assume leadership of the country Among the key questions addressed in the book are How do Chinese millennials differ both from preceding generations in China and from their counterparts around the world How can current and future relations between Chinese millennials and the Chinese government be assessed And what are the factors or fault lines that have shaped the intra generational differences among China s young people Members of this age cohort are extraordinary and in some respects unique in contemporary China Their ascent has accompanied five historic and far reaching developments These include China s rapid economic rise the adoption of the one child per family policy the largest domestic rural to urban migration in Chinese history the opening of extensive educational opportunities abroad and the arrival of the digital era Young Chinese citizens have developed a comprehensive understanding of the world much faster than previous generations millennials see themselves not as extensions of the past but rather as the innovators of the country s future Through expansive and in depth empirical research on Chinese millennials and younger age cohorts people in their late teens and early 20s Dr Li s book illustrates how China s younger adults reflect the growing diversity and persistent inequality in society The book also explores how their distinct characteristics and views will shape the country s trajectory For the outside world developing a better understanding of this unique generation is an urgent task given that China now has more influence on the global economy and regional security than at any other point in modern history

China's Renewable Energy Revolution John A. Mathews, Hao Tan, O'Faircheallaigh, 2015-08-13 The authors suggest that China s renewable energy system the largest in the world will quickly supersede the black energy system that has powered the country s rapid rise as workshop of the world and for reasons that have more to do with fixing environmental pollution and enhancing energy security than with curbing carbon emissions

China in 2020 Angang Hu, 2011 A top Chinese economist argues that the rapid growth of China s economy

will lead it along with the European Union to rival the United States as an economic superpower in 2020 and face all the issues that come with this superiority including the environment impact and effects on the global economic market **Study**

on the National Conditions of Modernization with Chinese Characteristics Angang Hu, Shaojie Zhou, Yize Xie, 2024-10-03 This is an open access book Based on the analysis of China's basic national conditions and development trends this book begins with a general introduction to the study of modernization with Chinese characteristics and then discusses the comprehensive construction of a prosperous society in all respects unprecedented changes the new national system green modernization and technological modernization In addition there will be a presentation of in depth research on topics such as leapfrog development of human capital market the new stage of socialism common prosperity in 2035 and a summary of the basic characteristics and great significance of modernization of a Chinese style economy technology and education Through historical comparison this work will show the development stages and future prospects of modernization with Chinese characteristics focusing on international comparison especially a quantitative comparison with Western countries This will further highlight the fast paced effect of modernization with Chinese characteristics and place emphasis on the uniqueness and innovativeness of modernization with Chinese characteristics [Danger Zone](#)

[Michael Beckley](#), Hal Brands, 2022-08-16 A provocative and urgent analysis of the U S China rivalry It has become conventional wisdom that America and China are running a superpower marathon that may last a century Yet Hal Brands and Michael Beckley pose a counterintuitive question What if the sharpest phase of that competition is more like a decade long sprint The Sino American contest is driven by clashing geopolitical interests and a stark ideological dispute over whether authoritarianism or democracy will dominate the 21st century But both history and China's current trajectory suggest that this rivalry will reach its moment of maximum danger in the 2020s China is at a perilous moment strong enough to violently challenge the existing order yet losing confidence that time is on its side Numerous examples from antiquity to the present show that rising powers become most aggressive when their fortunes fade their difficulties multiply and they realize they must achieve their ambitions now or miss the chance to do so forever China has already started down this path Witness its aggression toward Taiwan its record breaking military buildup and its efforts to dominate the critical technologies that will shape the world's future Over the long run the Chinese challenge will most likely prove more manageable than many pessimists currently believe but during the 2020s the pace of Sino American conflict will accelerate and the prospect of war will be frighteningly real America Brands and Beckley argue will still need a sustainable approach to winning a protracted global competition But first it needs a near term strategy for navigating the danger zone ahead
